Thread: [aim assist ESEA/ESL/EAC](#)

Bosiniooo - October 22, 2018, 1:04 pm

I have a private radar which works perfectly so far on ESEA. However, competition is high and I need an aim assist. I don't want a DMA hack. I've had twenty or so offers during last week only about it. I want a hack that runs on my computer and that's all. I want to be able to load it at my local LAN tournaments as well and they all use both EAC or ESL. It depends who's hosting. Can anyone recommend someone who isn't a scammer? :/

Edit: Yeah you definitely can't code a cheat for esea ?

you got a private radar for esea, yeah well just be happy with that, no point reaching so hard for an aim assist when u will more than likely get scammed or banned fast.

What private radar are you using? they are banning a lot of people on ESEA now for hardware cheats

I'm safe and the owner is trusted and clever. I do need an aim assist though.

ThE_BuTcHeR - October 24, 2018, 6:50 am

What are you using that is so special? Because ESEA had a huge post about hardware cheats.

Why dont you just use your current radar coder to make an aim assist for you?

tobattle - October 24, 2018, 10:13 am

That's not within the scope of his copy/paste abilities.

It isn't for sale anymore and only available to whoever has had it before.

This kid doesnt own any ESEA cheats, also is a retard. Do not talk to him or you will lose brain cells.

You have been warned.

is ESEA still ud? if they aren't manually banning then how are many hardware cheats not banned? maybe it all just to scare or they are only detecting default VID and DID? i don't used my sp605 with pcileech since august but my account is still ban free (changed the default VID/DID).

Think for yourself. When i release this cheat here and show proof to the people who actually have funds to purchase this cheat. We will see.

PingersAndMash - October 25, 2018, 10:56 pm

PUT SCAM REPORT UP. OF COURSE UR GONNA GET DETECTED MANUALLY BY THERE RAT
