Thread: [\\*\\*\\*NEW HACKING/DEV GROUP\\*\\*\\* FOR ALL TECHNOLOGY ENTHUSIASTS](#)

Enthusiast - October 22, 2018, 8:53 pm

Nope, not some typical skid post looking to recruit 1337 haxors to take over the world with our loic n windows 98 botnets ???

The group is for any color of hats. Merely to grow your knowledge in deeper depths, even if you classify your self as an expert there is always more to learn. To be a excellent chef, you know many flavors, so what ever you get hit with or stuck with, you can still be amazing. This group will help everyone grow, more than what you'd typically see. We'd keep each other updated with new technology, vulnerabilities, interesting finds, and so on.

Chats will be on secure messaging communications mostly, discord server may be in use too.

Requirements    No scam reports

Must be an upgraded user (Uber, Leet, Epic) (A EXCEPTION MAY BE MADE...)

Over 250 post count

Skilled in some technology related field preferable.

No skids, sorry. Some people don't have enough patience to mentor from the very beginning with someone having no knowledge in any fields.

Application Form:

Code [b]My main skill(s) (Can be more than one):[/b]

[b]Other skills(technology related and non-technological):[/b]

[b]What hat would you classify as(if any):[/b]

[b]How would you describe yourself?:[/b]

[b]What would you say is your biggest accomplishment?:[/b]

[b]How can you contribute to our group?:[/b]

[b]Why you should be selected over anyone else?:[/b]You may submit the application via reply to the thread, PM or email.
