Thread: [Looking for bug abusers for a 718 revision rsps](#)

WISE guys - October 22, 2018, 9:42 pm

Looking to find people who can find bugs and glitches particularly in the financial economy such as dupes/item manipulation etc. If you can find me a working way to dupe I will give you \$70 or 100m osrs gold feel free to pm me if you are interested.

The server is Ataraxia-ps its a rs3 based server.

Here are some things i have from the times when i worked on 718s. Note that most of those probably won't work unless they didn't fix any of those but always worth a try:

Squeal of fortune play button spamming dupe

Tyluur's player-owned shops dupe (gotta try a bit w/ the player owned shops, don't really remember what it was)

amulet of glory (t4) turns into a 3rd age kiteshield when you use one or all of the charges

General store/shops +1/+5/+10 buttons dupe (click those if it isn't fixed it should give you free items)

Other than that try around with anything involving buying/selling/obtaining items, most of the time shit servers leech from every source they can get their hands on or a tutorial/snippet that most likely has anti leech for that purpose, so there is a chance somewhere there could be a dupe ?

I don't think any obvious methods would be viable would probably take some testing. The reward is still offered and could be raised depending on the results.

I recall something with the money pouch within the 718 servers.

Withdraw from money pouch input "-2147M" and it would give you the 2147m within the inventory. As for other ones, I know multiple 718 dupes include forcing interfaces within shops / messing around with the shops.
