Lion - October 23, 2018, 4:56 pm
Get you some soft shells, or lightly fry a tortilla and make your own. SUPER BOMB.

Mexican restaurants don't have hard shell tacos are their flagship taco, it's always a soft taco.

Thanks lads! They are doing well in my stomach. ?

Haven't had a pizza in a good while, most of the time it's a frozen one whenever I have no energy to cook dinner on the weekends.

If not, then dominos ?

IcYSeptember - October 23, 2018, 5:00 pm

It was more of a filet mignon with a gorgonzola compound butter & vegetable night for me. But tacos are nice too.

Lavish Living - October 23, 2018, 5:00 pm

No beans or cheese? Forgot to pick them up from the store? or lactose intolerant or.... nah any which way, inexcusable.

Cheese is at the bottom ;)

Beans will have me tooting into tomorrow! Farting like that security guy who videoed himself and ended up getting fired.

As for the award- I kinda half ass'd it and was fortunate to get the award, so i'm now paying homage!

Reason being was the weather; prevented me from getting out there and scoring some fast food tacos.

Steady does it! I have been quite talkative today, so it has been natural for me.
