Thread: [Selling Counter-Strike: Global Offensive cheat project | No experience needed](#)

int main() - October 25, 2018, 10:26 am

Selling a cheat source code, ready to be sold to the masses and with autobuy

aob scanning for addresses (most likely will never have to update it)

Features:

External

D3D Menu

Aimbot

Fov

Smooth

Bone

bounding boxes

Aimbone

Triggerbot

Bone

Key

\$150 written from scratch (only way we can confirm this is by you being somewhat of a decent developer and knowing how to google) otherwise take my word for it, it's a neat project

I also have an internal project, I will teach you how to port this to any source engine game that you wish and possibly other engines however depending on the game I may not be able to assist on the reversing part. You can make your money back in a few days, all you really need to have is visual studio and click a button or two

Yu Yan - October 25, 2018, 10:29 am

Is this based on any open source or completely from scratch?

lunaticcc - October 25, 2018, 10:49 am

I've a question, when you say that no experience is needed. What about when VALVE pulls a new security update or something for the game, so that the cheat needs to be updated?

The cheat hasn't needed updating for the past 5 years the patterns will only break if a HUUUUUUUUUUUUUUUUUUUUUUUUUUGE game update comes out which most likely won't happen until source engine 2, so you have more than enough time to make your money back.

BITCHLESS - October 25, 2018, 11:05 am

Any pictures? Which anti cheat support?
