Thread: [\[OPEN SOURCE\] UDP Unicorn: Multithreaded UDP Flooder \(DoS\)](#)

Sparkyy - August 4, 2010, 7:56 pm

[img]http://img27.imageshack.us/img27/313/udpf.png[/img]

A Win32 UDP flooding/DoS (Denial of Service) utility with multithreading.

Video Demonstration: http://www.youtube.com/watch?v=6i1qk_lzEUA

Download: <http://udpunicorn.sourceforge.net>

No need for virus scan - open source.

- Can target one port, or flood random ports.
- You can define a specific packet size, or use random packet sizes.
- You may ping the target, and resolve a hostname to an IP address with Reverse DNS.
- Edit delay, timeout, number of threads, and sockets per thread.

If you plan on using this to boot over Xbox LIVE or other online gaming, make sure you are host, or have an amazing connection.

Sage Mode - August 4, 2010, 7:58 pm

Looks like a pretty good tool, nice share. But if you did not create this file you should credit your sources.

NExtliFE - August 4, 2010, 8:05 pm

Hm...I Didn't Look At Source But I Think This Is My Source ? Go You!

Sparkyy - August 4, 2010, 8:07 pm

I created the source, I have a couple of screen names.

eXert - August 5, 2010, 12:28 am

works perfectly fine tried on friend for 10 secs and it kicked him off the internet lol

NExtliFE - August 5, 2010, 12:30 am

Bumping A Forgotten Thread Which The OP Has Low Post As Do You...Could He Be A Clone?

eXert - August 5, 2010, 1:31 am

how is it a forgotten thread when he posted this yesterday? ive been searching for some good udp floods and see some basics on them because i would like to try to make one my self but no im no clone.

-mothered- - August 5, 2010, 6:01 am

Nice mate, checking It out at the time of this post.

Thank you.

Successful_Coder™ - August 5, 2010, 12:43 pm

preety cool mate,good work! :))

Marko2911 - August 9, 2010, 10:32 am

Uhm How Can i use this..it wont work for me..when i try to ping targ it says SENDING IMCP REQUEST,NO REPLY FROM THE TARGET...wtf...

and when i do attack it just keeps counting does noting

Sparkyy - August 11, 2010, 4:49 pm

Not all hosts will reply to pings, and as long as the the "Data Sent" number is increasing, UDP packets are being sent. If you still think it's doing nothing, monitor with Wireshark and see them for yourself.

Are you trying to boot over an online game?

You need to be host, or if you have a good connection, attack in short bursts of about 500 KB.

naramsin11 - August 28, 2010, 2:33 pm

not working.. when attacking someones ip.. my own internet gets shouted off.. wtf?

Dirty_Sanchez - August 29, 2010, 9:48 pm

didnt work for me

to short

Sparkyy - August 31, 2010, 10:02 pm

Then you guys have more to learn about networks, ports, firewalls, and how a UDP Denial of Service attack works.

DaRkReD - August 31, 2010, 10:12 pm

Sparkyy .. Always I wanna be with you and make believe with you UDP unicorn attack!

great app!

blackhawksom - December 9, 2012, 9:08 pm

Nice program works really good with windwows 7 64 bit. Was wondering if you could help me out getting it to work on windows xp tho :X?

Rizo - December 9, 2012, 9:18 pm

Dude, this thread is old as fuck. Also the OP hasn't been on for 4 months. Please try not to grave dig threads (comment on old, dead threads) ?

Rahul007rhp - December 10, 2012, 2:11 am

Wow Bro Firstly Thanks for direct Link !

Keep Up the Good Work...

Bogatyr - November 21, 2013, 5:15 pm

Very old tool. I have seen it on the net for ages. At this point, i think it's useless.

UDP ATTACK - November 22, 2013, 5:46 am

Might check this out later thanks for the share :)

Paradoxal™ - May 2, 2014, 10:24 pm

If this is open source, where may i download the source?

eacdII - August 20, 2014, 2:46 am

gj nice working simple looking tool
