Okay first of all, shouldn't this be in the Service Offering section? Second, how come you claim to be the #1 programming service service in your thread title, but then only say that you are "aiming" to become the #1 in the thread itself?

I don't even run a programming service, it just pisses me off how everyone claims to be #1, especially if their service is less than a week old. Start small, start humble, and then one day you'll grow to something bigger.
