Thread: [If you could witness any event of the past, present, or future, what would it be?](#)

Profession Agent - October 26, 2018, 2:43 pm

I would go all the way back to see how it was to be the first humans on Earth

If you could witness any event of the past, present, or future, what would it be?

GrrimzZ - October 26, 2018, 3:09 pm

I would witness the world being created just to see how it was.

blacknoodles - October 26, 2018, 3:21 pm

Past: The Philadelphia Experiment.

Present: None that I can think of.

Future: Turing test of the very first 'self-aware' AI and the moment warp drive (something the future generation may use to visit another galaxy, which is I am sure possible) would be introduced to the public.

Yin Yang - October 26, 2018, 3:43 pm

sudek - October 26, 2018, 4:48 pm

Who Soup - October 26, 2018, 4:50 pm

I'd only want to see the beginning and the end of the world

Omniscient - October 26, 2018, 4:51 pm

I think the Sermon on the Mount would be historic to witness.

https://en.wikipedia.org/wiki/Sermon_on_the_Mount

Or maybe the signing of the Declaration of Independence?

https://en.wikipedia.org/wiki/United_States_Declaration_of_Independence

Hm...how about watching Leonardo da Vinci painting the Mona Lisa?

https://en.wikipedia.org/wiki/Mona_Lisa

As for the future. I'd love to witness the day we step on Mars.

Enthusiast - October 26, 2018, 4:53 pm

The beginning of human corruption.

As for the future, the end of our species. I believe it will happen one day, it seems we are built to destroy things and ourselves. We lack the shelf life of good things sadly.

RAT - October 26, 2018, 4:54 pm

Adolf Hitler giving his speech.

I agree with da vinci, he was a brilliant man and many people don't see this nor comprehend. I love omni for this.

Lmao, wtf mate... Many people do see & comprehend this... Your argument makes no sense.

Explain then, "many" would be classified as the "majority". People don't see how mathematical he was, and how he seen everything differently. Our populations seemed to be dumbed down. Many paintings haven't even been found, even to this day they seem to be finding "secrets" behind hiss paintings. I am not making a "argument"? Explain how I made an argument at all...maybe you aren't comprehending shit at all. Why did you take your time out to reply, what omni posted was merely not to see facts, a point of view what people would want to see...?

Not to be a asshole :) at all

Not to be an asshole, yet you're typing shit just to make a point lol... Show me the research behind your statement of people not being capable of knowing how special Leonardo was? I agree that most people don't appreciate him enough and don't know enough about him, but saying that "people aren't capable of seeing or comprehending that he was a genius" is a lie... Like literally, the people who need to know about him in the western culture already do, it's just ignorance if they don't, that's it.

I was just trying to point out things and yes, I agree that my English isn't perfect, but sure, just go on and throw shit at me. I just don't agree with your statement that there aren't enough people who "appreciate Leonardo da Vinci".

No need to make this shit be personal "why did you take your time to reply"? Fuck you. It wasn't anything personal.

I think he meant to say that da Vinci is not talked about as much as other great minds and he deserves more credit.

True, but does it make any significant difference if we would give him more "credit"?

[i]PS! Just to be sure, I'm not trying to be hostile here

In terms of historical art, I agree with this. If I could give him advice, i'd tell him to pick a better color palette for longevity purposes cause the Mona Lisa is pretty washed out. Granted, it has been a long time and he didn't know it would be where it is now.

oscast - October 26, 2018, 6:17 pm

Honestly the Jack the Ripper murders. I really want to know who he was.

dontspamthisplease - October 26, 2018, 7:01 pm

How can I even ask to be a part of or witness an event in the future without knowing literally anything about the future? Haha. But uh, for the past I'd probably wish to see really old animals like dinosaurs, any event from that time would let me see them so anything that happened back then.
