Thread: [Black hat Trick to generate 5000-1000\\$ a day from adsense](#)

BelaChange - October 26, 2018, 5:18 pm

1. Open site that you could quickly bring a lot of traffic too. Like a porn site or TV SERIES.
I recommend on TV series because you could quickly bring lots of traffic to this site.
especially if it is not in English and there is no competition. if you live in Germany, Bulgaria, Brazil, etc just make a website with all the hot tv shows and update episodes every day. When you upload a video with the new episode that released on this day the competition in Google is easy.
And you just need a basic SEO knowledge.
I had 30-40k visitors per day without efforts.

2. Open blog in Blogger with content (I recommend on Lawyer blog/car insurance etc.) google appreciate those kind of sites and content/ the CPC is high. And they unlikely to block it because they have many publishers that pay a lot on these niches. Open 1 or few blogs if you want to make some big money and you can bring a lot of traffic.

3. Link from the site you upload episodes too on its new episode page big Banner (To watch the episode click here)
when they click it direct them to the blogger page where you add another banner (to view the episode click on the ad and wait 30 minutes)

and boom you got loads of clicks on your Google Adsense ad.

I would stop on 5000-1000\$ per one adsense account and remove the ads after 1 day before it get reviewed.

on my best day, I made couple of blogs and make 24k on one day.

4) how you open many Google AdSense account without getting banned?
you can buy aged AdSense account this is the recommend way because google unlikely to block them
alternatively, you can open many Adsense on different names and send the verification paper to couple of mailbox you opened in multiple cities/streets. instead of sending it to your home.

5) you can use the same bank to get all the money. They don't notice.

I would send you a screenshot of my Adsense accounts, but all of them got blocked long-time-ago. I stopped doing it because it became unstable and didn't work for me couple of times (2-3) and discontinued to do it after this.

But I still firmly believe that this method is still working. I just prefer stable things like what am doing now.

if i have a chance to do buy a site with lots of traffic i will definitely open couple of blogs again and do this method.

So you rank blogger and people visit there and then to your main site?

How long it takes you to rank blog in google and do you build backlinks?

No, you don't rank blogger. They don't matter. I mean they do matter they need to have quality text and look legit, but that's all.

The main things are to have the site with Traffic to link to these bloggers.

When people click on ads from quality bloggers with quality text in quality niches. Google unlikely to block your Adsense. If you put Adsense on your TV series site, you'll get banned in the same day.

GreyGorilla - October 29, 2018, 9:22 am

How long it takes you to rank since it is new site, and do you build backlinks?

it take 1-2 weeks to see results. i didn't send a lot of backlinks maybe 1-2 everyepisode at first.
after that i didn't everything was on auto pilot because there is no competetion on new episodes
so whoever upload them and have some initial traffic got rank..

you need some basic seo knowledge for titles h1 etc

wanderer100 - October 29, 2018, 3:51 pm

24k in one day!!! You can't say that and not show some sort of proof of your earnings haha

manontop - November 5, 2018, 9:12 am

Damn that's some sick income wish you could mentor me or something, i don't understand how to go about step 3 how to build a function on the blog to condition the user to click the ad before watching the episode.

Kuldar - November 5, 2018, 9:19 am

I've seen people doing something similar. You need to be creative ;)

vintersorg - November 17, 2018, 8:44 pm
