

Forum: [Hack Forums](#)

Thread: [HF Blackjack Script](#)

Benoit balls - October 30, 2018, 1:33 am

Wrote an automatic blackjack player for HF

<https://pastebin.com/rzSNmYQJ>

Usage:

1. Place your cookies in the same folder with the script in a text file called cookies.txt, you can get that file using the extension from chrome:

<https://chrome.google.com/webstore/detail/cookiestxt/njabckikapfppfapmjgojcnbfjonfjfg?hl=en>

2. Get your post key by clicking view page source and copying the value in 'var my_post_key = <value_here>'

3. ./blackjack.py <your_post_key>

An even better tutorial by Mr Robot: <https://hackforums.net/showthread.php?tid=5902001>

Using this with the method described at <https://hackforums.net/showthread.php?tid=5901184> seems to be the most effective way of using the bot.

The script uses this site to make choices: <http://blackjackdoc.com/blackjack-advisor.htm>

Supported actions: double, hit, stand, surrender

It also has a built in visual graph of your balance:

Post key example:

In case someone is getting 403 errors follow this post instructions:

<https://hackforums.net/showthread.php?tid=5901348&pid=57803105#pid57803105>

SIM-1349466 - October 30, 2018, 1:35 am

Can't use it cause i'm on my phone. Would like to hear what other members think of it.

ETH - October 30, 2018, 1:36 am

Nice things coming on hf

On gaming

JTMBoss - October 30, 2018, 1:37 am

is this script playing basic strategy or what does it use.

John Doe 5726 - October 30, 2018, 1:39 am

Lol bro.

Seriously?

Human - October 30, 2018, 1:43 am

Lmao this is great. Ill try it out rn

(Oct 30, 2018 01:43 AM)Dadd Wrote: [\[CITE\]](#) Lmao this is great. Ill try it out rn
lmk how it plays compared to basic strat

I'm thinking of asking adam if he'd be interested/willing to write up a userscript for Blackjack session stats. I just want to know how much I've won or lost, and how many Blackjacks I've hit in a session.

This is a very interesting script. Thank you for creating and sharing it with the community :, I've seen a lot of people in the AutoSlot thread ask about a script or something regarding blackjack.

Look-ey what we have here, boys.

Nice!

Tfw the guy who developed the script has less than 50 bytes.

(Oct 30, 2018 03:45 AM)John Doe 5726 Wrote: [\[CITE\]](#) Tfw the guy who developed the script has less than 50 bytes.

It's just to play it, not to make money. It's for the award I think

I lost 84 bytes in black jack :D the system is rigged man wtf. :D :D

Awsome. Lets increase chances to win dicey award to 1 in 5000000000000000000000000.

It would probably be easier to use a userscript, but this still looks nice OP.

Saw that my man had less than 50 bytes NTY

(Oct 30, 2018 03:44 AM)James! Wrote: [\[CITE\]](#) Can you please provide a full description and information as to what it does and how it work.

I've added the information on thread.

It works by using your cookies to send requests to HF blackjack endpoint and simulating a player playing the game. The code makes choices using a blackjack advisor I found online.

(Oct 30, 2018 05:08 AM)PAIN Wrote: [\[CITE\]](#) Saw that my man had less than 50 bytes NTY
Check now :)

Oh boy, now I can lose money while afk too?

Lord please help me.

Lynx - October 30, 2018, 9:37 am

Wow, thanks! Might try this later.

spradebassen - October 30, 2018, 10:04 am

i have a feeling this doesnt work as expected

Redemption - October 30, 2018, 10:17 am

So in a follow up from a reply I made here earlier, I've used this script for roughly 2,050 blackjack games. The total cost I've spent is roughly 8,100 bytes but I've won over 9,200 bytes on top of getting the Dicey award. For me, this script worked amazingly! Keep up the great work.

Unkn0wnUs3r - October 30, 2018, 10:27 am

Doesn't all of these auto scripts ruin the point? Omni might as well just add auto-spin to the slots now? Wonder what Omni's thoughts on these are? Don't get me wrong, I'm using the auto-spin script by Adam on slots, but it just seems to defeat the object.

Ombra - October 30, 2018, 10:49 am

Looks cool if that helps to get the Dicey award.

Anyone else used it?

Redemption - October 30, 2018, 10:54 am

(Oct 30, 2018 10:27 AM)Unkn0wnUs3r Wrote: [\[CITE\]](#) Doesn't all of these auto scripts ruin the point? Omni might as well just add auto-spin to the slots now? Wonder what Omni's thoughts on these are? Don't get me wrong, I'm using the auto-spin script by Adam on slots, but it just seems to defeat the object.

It does ruin the point for some users. For me personally, I enjoy automation, even outside of using these scripts for slots and blackjack I've always attempted to automate whatever task I gotta repeat.

Yin Yang - October 30, 2018, 10:56 am

(Oct 30, 2018 01:58 AM)?usiness Wrote: [\[CITE\]](#) I'm thinking of asking adam if he'd be interested/willing to write up a userscript for Blackjack session stats. No I'm not missing anything. I keep getting 403'd no matter what.

2018-10-31 14:01:44,715 - blackjack_hf - ERROR - unexpected status 403

I ran your debug script on Windows and confirmed it's the captcha causing the issue.

The script keeps triggering the captcha no matter what. I tried altering the user agent but no luck.

It shouldn't be trigging captcha as the cookies are valid, this is just odd.

UPDATE: Messed around with the user agent and finally got it running on Windows
<https://pastebin.com/fesfKY8H>

Here's my version. Also added the post_key to the script so you can just do python3 script.py

no need to put post key each time you want to run the script

```
#CHANGE THE POST KEY BELOW DO NOT CHANGE ANYTHING ELSE
post_key = '000000XXXX0X000X00X0X'
```

If anyone else is getting 403'd

Just go on google and type

What is my user agent

and it will tell you something like

```
"Your user agent
Mozilla/5.0 (Macintosh; Intel Mac OS X 10_14_0) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/70.0.3538.77 Safari/537.36"
```

Copy and paste that into the script and it should do the trick.

It shouldn't be triggering captcha as the cookies are valid, this is just odd.

UPDATE: Messed around with the user agent and finally got it running on Windows

<https://pastebin.com/fesfKY8H>

Here's my version. Also added the post_key to the script so you can just do python3 script.py

no need to put post key each time you want to run the script

#CHANGE THE POST KEY BELOW DO NOT CHANGE ANYTHING ELSE

post_key = '000000XXXX0X000X00X0X'

If anyone else is getting 403'd

Just go on google and type

What is my user agent

and it will tell you something like

"Your user agent

Mozilla/5.0 (Macintosh; Intel Mac OS X 10_14_0) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/70.0.3538.77 Safari/537.36"

Copy and paste that into the script and it should do the trick.

Hey, good job on the fix! It fixed the issue for me ?

- Z - - November 1, 2018, 4:54 pm

Welp, their goes all of my bytes, I will for sure check it out.

Wolf - November 2, 2018, 4:50 am

Could you record wins and losses and come up with your own advice, instead of using blackjack advisor website? It might be more accurate.

Benoit balls - November 2, 2018, 6:23 am

Could possibly try and measure and see if the random is truly random.

I doubt that it would be any better

<https://hackforums.net/showthread.php?tid=5902001>

I made a tutorial on it.

Jacked - November 2, 2018, 6:57 am

Thank you for sharing mate ;)

Michael - November 2, 2018, 8:20 am

That blackjack site in OP is a very nice site to base your actions on.

Might use this script soon, thanks OP.

Neodraxis - November 3, 2018, 9:46 am

Definitely will take a look at this. Thanks.

Fortunate - November 3, 2018, 2:19 pm

It really seems to work!

Also, thanks for jamming to my video when playing ?

Neodraxis - November 3, 2018, 3:29 pm

Some reason I can't even get the first step done regarding the CMD haha.

Abbaas - November 3, 2018, 3:36 pm

Going to try this out when i have a reliable amount to play with thanks for sharing.

Demon Lord - November 4, 2018, 1:17 pm

This is pure gold!

2bad I'm on mobile

Pronouncer - November 10, 2018, 5:33 am

<https://pastebin.com/raw/hrKK9Uk3> any ideas what causes this, as i have no fucking clue what to do to fix

Benoit balls - November 10, 2018, 7:16 am

You already have a game in progress. finish that game and then restart the script.

Game - November 11, 2018, 2:12 am

Decent script, ended up rinsing me out but still, aha.

(Oct 30, 2018 01:58 AM)?usiness Wrote: [\[CITE\]](#) I'm thinking of asking adam if he'd be interested/willing to write up a userscript for Blackjack session stats. I just want to know how much I've won or lost, and how many Blackjacks I've hit in a session.

Always thought this would be a good idea for both games but it would calculate from when you started using it.

Effexion - December 20, 2018, 4:01 pm

(Dec 20, 2018 04:14 PM)xadamxk Wrote: [\[CITE\]](#) With our without the bot running? I mean, surely you couldn't get stats from before the deployment of the bot?

I'd love to see my slots stats lol.

It'll just be a little more complicated.

I mean, could you track every spin even prior to the release?

Effexion - December 21, 2018, 3:11 am

How do you make these? I'm guessing JS but I am probably wrong. Whatever it is is super useful and you're obviously acing it.

FawkCidy - December 21, 2018, 5:38 pm

Posting to come back to. Looks super interesting. Well done

Benoit balls - December 22, 2018, 6:18 am

It's a python script that communicates with the server as if you were to play the game from your browser.

The source code is available on thread.

Lakai - December 22, 2018, 10:24 am

Did the script work? Gonna scan through the pages for some results haha.

Benoit balls - December 23, 2018, 12:06 pm

Yeah It still works. However I can't promise anything about it being profitable.

The Delta Software. - January 5, 2019, 4:48 pm

Is the script really working?

Benoit balls - January 6, 2019, 10:12 am

Yes.

King - January 6, 2019, 10:21 am

Thanks for this. I will give it a try once I get more bytes.

Benoit balls - January 6, 2019, 11:20 am

(Jan 6, 2019 11:21 AM)-BoodyE- Wrote: [\[CITE\]](#) Thanks for this. I will give it a try once I get more bytes.

Around a 100 bytes should be enough to run it for quite some time.

Although I can't really promise anything about how long it'll last.

MateXXs - January 17, 2019, 11:07 am

I'm thinking of trying it.

Brew. - January 17, 2019, 1:08 pm

Well I wont use it but thanks for making one!

I keep it with slots for now on

Nick - January 18, 2019, 10:59 am

Started it with 22 bits and it's been running for about 2 hours. Not a bad increase if I do say so myself. Thanks for this.

Benoit balls - January 19, 2019, 10:20 am

Nice. How long did it take?

SoulZeh - January 23, 2019, 11:55 am

How come people that have posted in this thread are doing very little amounts? Is that up to them or the script?

Excuse my spelling been awake far too long.

Benoit balls - January 23, 2019, 11:57 am

(Jan 23, 2019 12:55 PM)SoulZeh Wrote: [\[CITE\]](#) How come post people that have posted in this thread are doing very little amounts? Is that up to them or the script?
the script by default bets on 2 at a time. I'm guessing people with no technical knowledge don't touch it.

Nick - January 23, 2019, 12:05 pm

(Jan 23, 2019 12:57 PM)?Leonardo Da Vinci Wrote: [\[CITE\]](#) the script by default bets on 2 at a time. I'm guessing people with no technical knowledge don't touch it.
Probably this ^. I changed mine to 10 at a time and lost my entire bankroll 15 mins later so 2 is probably wise unless you have 1000. Dicey award took around 7 hours.
