I got keyboards, computer mouses, and more. How much accessories did you get for your PC and what did you get?

b?xxy - October 30, 2018, 9:39 am

I have keyboard, mouse, speakers, headset, studio headphones, XLR mic, triple monitor stand, etc.

I have my mouse, keyboard and Astro A40's headset. I could get some speakers but the people in my house don't wanna listen to the music I listen to.

I have a keyboard, mouse, mousepad, and a headset. I should really buy a new headset though... There is a beep in the left side after playing music or any other sound actually.

I have a keyboard, mouse, xbox controller, mousepad, headset and a microphone.

My headset is quite old though and I think it needs to be changed soon.

It's mice, not "mouses"....

I have a standard setup...

Keyboard

Mouse

Headset

Monitor

USB drives.

Got the main generally needed extras.

I have some generic RGB mechanical keyboard.

Wireless Logitech gaming mouse.

Hyperx headset.

Logitech webcam.

Logitech speakers.

Hp monitor.

That's all I can think of right now. I do now realize I do have quite a few Logitech products.

A phone cable is an accessory.

A mouse is a peripheral.
