Thread: [Sell Tesla Stock. I Predict That Shit Is Going To Happen](#)

**Demoralise** - November 1, 2018, 5:35 pm

These new technological features and Elon Musk's general direction is causing a lot of controversy not settling well with some of the public and I believe that as a result people are losing faith in Tesla and I also feel like some of these technological advancements will fuck over the company

**Nachfolger** - November 1, 2018, 5:36 pm

This is some propaganda if I have ever seen it.

**Demoralise** - November 1, 2018, 5:38 pm

(Nov 1, 2018 05:36 PM)Nachfolger Wrote: [\[CITE\]](#) This is some propaganda if I have ever seen it. The lessening demand for Model 3 is fucking over their stock portfolio. Fact

**Lukas** - November 1, 2018, 5:44 pm

Buying more Tesla stock.

Thanks for the advice.

**Demoralise** - November 1, 2018, 5:47 pm

(Nov 1, 2018 05:44 PM)Lukas Wrote: [\[CITE\]](#) Buying more Tesla stock.

Thanks for the advice. I wasn't saying this to stop people from purchasing Tesla because I think it is going to rise. I genuinely don't think it will and I believe that the stock value is going to plummet

**Presett** - November 14, 2018, 12:30 am

I believe this to be the contrary,  
Tesla might rise more than ever.

As the world transforms to Natural gas.

Electric cars and Power plants will turn to Natural gas.

This means green power will be more of a priority for governments, For an example, The Israeli government already added some laws regarding electric vehicles taxes,

They're privatizing into Electricity power plants that run on gas.

And I dunno, Israel is part of the big buck monopoly game 'ya know.

(BTW "Natural gas" SYB: NG gonna have a big rise take a look ? )

Also, Many companies are developing technology for autonomous cars, (Mobileye + Intel , ETC')

Tesla, will rise as it already has widely known reputation.

You can even take a good look while watching the graph good enough, you'll see.

Sales will rise soon. I believe that by 2020 Tesla should double itself.

Good luck!

It's apparent you have no idea how a company works. EVEN if all that is true... Tesla has to survive that long. It needs money to do so. Market risk, credit risk, and operational risk. I'd say... all three of those risks are through the roof. By 2020 Tesla has a very high likelihood of being bankrupt. Tesla is insolvent at the moment and they have some debt coming due. Cost of capital is becoming more expensive, and car sales are declining around the WORLD. Tesla is so overvalued, I don't know why it's not trading at like \$3 a share.

**DaGeekin** - December 25, 2018, 8:20 pm

I personally wouldnt go into it or anything at this point. But Trying to predict the downfall of something run by or run with a thinker like musk would be too much I think.

**Demoralise** - December 26, 2018, 1:00 am

....And who was right? Yep. I was correct indeed

**yesAGI** - December 29, 2018, 2:14 am

(Dec 26, 2018 02:00 AM)Demoralise Wrote: [\[CITE\]](#) ....And who was right? Yep. I was correct indeed There's only a 11\$ difference in stock price between your first post and your last. I wouldn't call that "being right" lol

But joking aside, I don't think you should lose faith in Tesla, it's at the forefront of technology that the world is shifting towards. Plus, Elon worked his "magic" and made Tesla be and feel "cool" and a "must have" in the eyes of the consumers. I think it will have great future and short or mid-term predictions shouldn't be pondered too much as everything fluctuates in the market.

**Shockley** - December 29, 2018, 11:50 am

Tesla is hard to value. Best to just stay away.

**Tazxy** - December 30, 2018, 4:54 am

yeah i think like that too company will be fucked

**ucplusx** - December 30, 2018, 5:01 am

(Dec 29, 2018 12:50 PM)Shockley Wrote: [\[CITE\]](#) Tesla is hard to value. Best to just stay away.Still, invest on Tesla would not recommend for now, but maybe when most other crypto are going to uptrend rising then can be support Tesla value.

**Lakai** - December 31, 2018, 12:53 pm

Sell all tesla stock, itll never have massive gains, only potential losses.

**09e3rtge40r39gj** - January 4, 2019, 2:12 am

As long as Elon keep smiling stocks go up

**ZeroToHero** - January 6, 2019, 10:12 am

You can't stop the future. Sure there's people vandalizing the autonomous cars and parking in front of electrical vehicle charge sites, but this will all pass. Laws are being put into place to reduce carbon emissions and eventually foster in the autonomous car movement.
