11/6/2018 Still working and HQ!

Support is ONLINE! Don't just have fun with your slaves, make REAL, HARD MONEY with them.

Are you ready to learn how to run a massive income stream just from your slaves? I have been in the business for years. I've spent hours staring at a screen, spreading with trashy, saturated methods before. I've learned through trial and error what works best. I know the best methods to SPREAD your file and MONETIZE off of the results!

You may ask, if I can make so much money doing this myself, why would I sell my methods? I believe in multiple income streams, not putting all my eggs into one basket. I've moved on to other methods, and figure that I need to build some reputation with this forum. At the same time, I don't want these methods to become saturated, hence the price tag I've attached.

Review my previously posted threads and compare them with other vendors that sell similar products. You'll see the difference.

There is a refund option available if this does not work out for you. Please refer to the ToS within the eBook for further details.

For any questions simply post below or shoot me a PM.

Happy spreading and monetizing!

There is a bonus method included that is related to selling, at least not in the traditional sense. This has nothing to do with flipping products, Amazon eBay or any of that bs. I can genuinely promise you that these methods are highly unlikely to be found elsewhere on this forum, as they are pretty private.

Firstly, welcome to HF! Secondly, there is a refund policy where if you don't make any money then I'll refund you 100%. I don't anticipate refunding anybody though given the quality of the methods here.

(Nov 3, 2018 04:49 PM)Warzaa-S.A Wrote: [\[CITE\]](#) hi what's the requirements ?

Well, it depends how you choose to do it. These methods can be executed very well with free software, especially with the premium package. Once you start stacking money you can pay for better software that will help even more but it is not required.

In summary, there are no requirements but a beating heart. That's partly why the product is so valuable.

To all concerned, the user essentially asked me if the product comes with support. The basic package comes with basic support, meaning if you don't understand something we will clarify it for you and point you to which direction you need to go. The premium package comes with FULL support and mentorship, meaning that we will help you until you are cashing out like the king of Egypt.

No. It can all be done without further investment. As with anything, having some capital will help but it's not required.

That depends on which method within the book you use to cashout. I can give you personal support and walk you through getting the money if you purchase the premium plan. The basic plan comes with basic support (for example, if you don't understand something)

I'm going to shoot you a PM.

Understandable question, however it's not stealing if you are monetizing off of machines from your own network is it? This eBook does not relate to malicious use. It is 100% within the rules of this forum.

What are the requirements to execute this method? Im guessing a RAT- crypted file, some online accounts (social media?) crypto wallets, VPN?

Is this autopilot once set up?

Does this involve mining on other peoples computers?

Does this involve eth (style) scam bots on twitter?

1) Is this autopilot - One of the methods is 100% autopilot, just requires initial setup. One of them is semi-autopilot in which you just need to do three - five minutes work every couple days. One method is completely pay-for-work based, meaning you get paid for how hard you work. There is a variety included for a reason, so that it can fit everybodys needs based on their time. I can assure you that whatever your schedule is, this will work for you.

2) Is it silent mining - You are not paying for a silent mining method, but it is mentioned in the book that once you have cashed someone out or if you have nothing to gain from a machine then it can be beneficial to drop a miner.

3) No twitter scam bots.

4) Requirements - VPN is advised (you'll be dealing with serious sums of money and people in high places so for opsec I'd recommend it of course) Crypto wallet to receive funds, crypted file is useful for some of the methods, though not required.

(Nov 5, 2018 12:40 PM)TricaPofa Wrote: [\[CITE\]](#) Do I have to invest something first?

Investment is not required though as with anything it helps. These methods can be performed with 100% freeware. Many of my clients use freeware at first and after profiting move onto better tools. We provide any freeware required upon purchase as well.

Thank you for your message friends!

Bought the product. Very bad content about saturated method.

They are more ideas than methods, because no specific tools are mentioned. Following my disappointment, I made a refund request to the seller, he refused by offering me to try these method saturated for 30 days and insisted on me participating in a private mentoring. I did not want to disturb him more time with this mentoring, but he insisted so much that I finally gave in. That's when he gave me a totally illegal method in addition to being very unrealistic which consists of to send payloads to ICO's founders. At that moment, I told him that I refuse to be part of this kind of scam, but he felt that he had sent his product and that I am no longer able to ask for a refund. He then strafed me screenshot proof with amounts that never exceeds about ten dollars. Friends I do not recommend this product. good luck to everyone !

Following my disappointment, I made a refund request to the seller, he refused by offering me to try these method saturated for 30 days and insisted on me participating in a private mentoring. I did not want to disturb him more time with this mentoring, but he insisted so much that I finally gave in. That's when he gave me a totally illegal method in addition to being very unrealistic which consists of to send payloads to ICO's founders. At that moment, I told him that I refuse to be part of this kind of scam, but he felt that he had sent his product and that I am no longer able to ask for a refund. He then strafed me screenshot proof with amounts that never exceeds about ten dollars. Friends I do not recommend this product. good luck to everyone !

To everybody reading this post, this asshole bought the product and demanded a refund without trying it. I was about to offer him one, when he threatened to log onto HF with multis and post that my product is infected. I give refunds to people when they respectfully ask. He then threatened to leak the product on other forums. He DID NOT try the product. Everybody who has tried it has made a LOT of money as evidenced by this thread, this user refused to follow the very specific instructions I gave him. I have opened a community alert against this man and Omniscient is looking into him.

I am absolutely astonished at the breadth of this users stupidity. I have issued refunds before, and I would have refunded him had he not threatened me. YOU are the reason you're not getting a refund, not me. At some point he threatened to "destroy my business". I believe he is too young to have an account here, and lacks the competency anyways. He also sent me a fake image of his "25,000 ETH" wallet (inspect element).

His PM to me:

"Listen to my brother, It's possible that you think your work is good, but from my point of view, I really feel like I'm getting scammed. I do not want to make you waste your time for mentoring and especially not to steal developers.

I work on my own bot metasploit, I use sophisticated linux tools such as SET or msfvenom making sure to use the latest 0day. If I do not have an immediate refund, I'm going to be a lot less friendly by sharing my opinion on the thread via my trusted HF accounts. I will make sure that people know that your files are infected and that they are useless. And if that's not enough for you, I'll post your content for free on the several leak platform such as nulled.to, without forgetting to share links on the HF thread. We're still at the stage where we could be good friends, I let you decide for now, money does not matter to me, it's the principle. You have one hour."

You forgot to mention that it was not the first PM i sent to you, i started by sending you a respectful request. It's very too easy to quote only some part of the story in your favor and please stop insulting me in public, i never did that with you, even in private.

Yes, you sent a respectful request at which point I offered the mentorship because you hadn't even received the private method before you asked for a refund... I never stated that I wasn't going to

refund you, I told you that you have to try the product before you refund. I said this very respectfully, at which point you threatened to log on with a multi account (Against the rules), salestrash (Also against the rules), leak the methods (Once again against the rules), and lie about the product being infected (Another rule!). Omniscient doesn't want to speak with you. You've broken so many rules that it's hard for anybody to take you seriously. You're too young to be on this forum. If you would have asked respectfully, I would have given you a refund but you managed to fuck that up too.

looking to buy the premium , a couple of questions tho

- 1- in how much time will i get my whole investment back ?
- 2- do i need to keep my laptop ON for days ?

also please pm your skype/discrd details

I can't pm sir so asking here.

Regarding your refund policy, in how many days you give if your method does not work?

For example - if I am not able to earn much for a week then will I get a refund?

Also please pm me your discord id.

I'm almost (I weigh my words, because this guy plays with the rules) certain that this guy uses these customers to send his own payload to victims of high importance and to cashout himself. In his mentoring, he claims that his friends have already earned \$ 200,000 by following his steps.

Please just be smart and think for a second, why would he make that to earn only \$ 30?

If there is someone trusted and competent, I am ready to send the backdoor that he sent me for a deep investigation.

Mates, I haven't scammed any of you. I've been swamped with PMs and because of that I am leaving sales on this thread closed until I get everything worked out with all of my clients.

I fucked up and took on too many clients then I could handle. I made a bunch of sales and nobody PM'd me but a few people, and then all of a sudden ten to twelve people who had purchased the product PM'd me. I have been inconsiderate in taking on too many people that I can handle.

I'm going to make a group chat with everybody who has purchased the mentorship, and I'm going to try and work with all of you at once, providing one on one in between these sessions.

I apologize for this, but please stop posting on this thread as all it's going to do is bump it, which is pointless if sales are closed at the moment.

Honestly feedback will probably be bad due to a recent situation. I made the mistake of selling WAY too many premium packages a few days ago, which include full 1-on-1 mentoring. At first people weren't PMing me much, so I figured that they were fine without the extra support. However, I started getting a rush of PMs, and 9/10 of these people haven't port forwarded once, never created a DNS service etc so it's been extremely difficult getting all of them squared away. I started to hunker down on everyone that I could yesterday, so things are starting to come along better than before.

Just a fair warning, if you do buy it and think you'll be heavily dependent on the mentorship, I would wait a few days until I get everybody squared away. However, if you already have experience with malware (I anticipated most of the customers to be somewhat experienced) then you won't have to wait long for me. The method itself is not difficult at all to get going with, it's just the fact that I have explain to people what ipconfig is.

What isn't helping the fact is that people are charging back.

Honest Review:

Guide Design 6/10:

The guide was quite basic, minimal pictures and graphics but full of information!

Methods/Information 9/10:

The Guide was jam packed full on information on how to do it, even had references to links and much more but was quite short if you were to compare to other competitors on the market but he made every word count! But that's the only reason its 9/10

Support/Help 10/10:

A lot of people on here are saying this guy's a "scammer", and never replies to support PM's I can assure you, this is definitely the best support you will get on the market! I have bought E-Books before and they say "24/7" support and other stuff but this guy is amazing, for the \$29.99

you pay for this book he is really working hard for it! He's already sent me screenshots of proof and help on the subject! This book is definitely about the support, the guide is quite short but support is amazing!

Overall Opinion 9/10:

I would highly recommend this E-Book along with the amazing dedicated support he give's, I feel he should limit his customers down to 10 a week and up the price, this is such a great deal for what your getting! Even the methods I would of never even thought of! The only downside in my opinion is that for people that don't know much, the guide itself does not provide that information for you, but is very beneficial to people that do know stuff about RAT's and Slaves, because you don't have to read all of the nonsense that beginners need! But of course if you don't know much there is always the dedicated amazing support he gives!

It goes back a long time. We speak on multiple platforms and then one of us misses the others message.

For example, when he had sent the message yesterday, one of my staff members had already sent him a message that he had failed to reply to.

I suppose he just missed it, and I can understand his frustration, but we are quick with responses.

I messaged OP (Fzsix) about my questions. They were very prompt in responding and very informative/candid as to what I would need to know/do before attempting these methods in order to increase my odds of being successful. They are very well spoken and professional, it was a pleasure speaking with them and I look forward to returning for a package when I am ready and have the required information I need.

Thank you very much for your time OP.

UPDATE: I am dishing out the 30 bucks and I am testing out the method(s) for myself, fingers crossed it ends up living up to the reputation that the vouches are saying, will post a review about results when i get some results haha.

These are private methods, and \$30 is honestly pretty generous for their quality. For that reason I cannot offer discounts.

Just review the vouches on this thread. If people are making \$200 in their very first day with it, there should be no reason for a discount. Not to be blunt, but it's just the way I see it mate.

The main method has nothing to do with a miner! A miner is helpful for monetizing though, and I outline extremely useful ways on how to spread your software.

If you try the method for 5 days with no success, I will refund 2X what you paid for it.

You see, if you get the premium package, the main premium private method is sent to you separately from the main eBook so as to avoid it being leaked if the main ebook gets publicized. This is to protect the method from becoming public.

Many of them got the base product but never PM'd me to receive their actual premium product. This led to the confusion that they were posting about :)

Big bump for Fzsix. Him and his team are taking some big steps making custom software, and he treats his customers with the upmost urgency/priority, a great business person with great products.

11/6/2018 Still working and HQ!

Support is ONLINE! Don't just have fun with your slaves, make REAL, HARD MONEY with them.

Are you ready to learn how to run a massive income stream just from your slaves? I have been in the business for years. I've spent hours staring at a screen, spreading with trashy, saturated methods before. I've learned through trial and error what works best. I know the best methods to SPREAD your file and MONETIZE off of the results!

You may ask, if I can make so much money doing this myself, why would I sell my methods? I believe in multiple income streams, not putting all my eggs into one basket. I've moved on to other methods, and figure that I need to build some reputation with this forum. At the same time, I don't want these methods to become saturated, hence the price tag I've attached.

Review my previously posted threads and compare them with other vendors that sell similar products. You'll see the difference.

>>BASIC package CLOSED<<
>>[Get the PREMIUM Package](#)<<

There is a refund option available if this does not work out for you. Please refer to the ToS within the eBook for further details.

For any questions simply post below or shoot me a PM.

Happy spreading and monetizing!

This dude will stole your money,

DON'T DEAL WITH HIM,

He scammed me on \$100.
