Thread: [Just downloaded a zip that is being detected as a trojan and ran the exe](#)

Sausage411 - November 2, 2018, 1:50 am

I downloaded this zip

https://anonfile.com/Q9P7qbkebc/WinRAP_v1.25_zip

and ran the program in it called winRap

shortly after out of curiosity i checked it on virustotal and 5 engines checked it as malware

[https://www.virustotal.](https://www.virustotal.com/#/file/5ac28644648947e1541d5cfe0c94c1069bbf83f46c451ab2417f44324e721e6c/detection)

[com/#/file/5ac28644648947e1541d5cfe0c94c1069bbf83f46c451ab2417f44324e721e6c/detection](https://www.virustotal.com/#/file/5ac28644648947e1541d5cfe0c94c1069bbf83f46c451ab2417f44324e721e6c/detection)

Can someone please tell me if this is just false detection or if i need to do something in order to remove it?

thanks very much.

Glossein - November 2, 2018, 4:53 am

This is most likely not a false detection. You need to remove it from your PC.

MAST3RM1ND19 - November 3, 2018, 1:18 am

Hi just incase download and run there

<https://nobotsecurity.com/>

<https://www.adlice.com/download/roguekiller/>

<https://www.malwarebytes.com/>

Be very careful when running a file especially on your production pc. scan the file on virus total or used sand boxie.

Aura - November 3, 2018, 11:53 am

Looks like a Mono/.NET exe so you could open it in dnSpy or iLSpy and see if it's actually malicious or not.

Elvira - November 3, 2018, 4:26 pm

it couldve been false but just scan to be sure
