Thread: [No gamble November & 10k bytes goal](#)

Crypt - November 2, 2018, 4:59 pm

It seems like I like a lot of other members have been losing a lot of bytes gambling. So I made this thread to see who will partake in the no November gambling. It's pretty self-explanatory, I won't gamble at all in November or until I reach 10k bytes (just need 1600 more posts ?).

So, who's in? ?

If you want to support me, trade 10 bytes for a +3:

<https://hackforums.net/showthread.php?tid=5902465>

Or rent my signature for 500 bytes for 7 days:

<https://hackforums.net/buysigs.php?action=details&uid=3523609> ?

Threads ending: ? I went the entire month without gambling and made over 10k bytes ? ?

Yeah, I am not gonna gamble, but I am also not going to go for 10k in a month. Too much dedication; seems like more of a chore than anything else.

It is 50-60 posts a day, so you can be the judge of how that would be for you to do.

Redemption - November 2, 2018, 5:20 pm

How often did you gamble before you started this goal? If you had to post 1600 times in this month alone for 10,000 bytes it'll take you roughly 53.34 posts per day to achieve that. It'll be a hard challenge but I believe in you!

I should probably do this because I keep loosing all of my bytes. Want to make a deal for it? If either one of us gives in and starts gambling, we owe the other person an award here on HF? If we both make it... Well we'll have a ton of bytes.

The amount of times I went from near 0 bytes to a few hundred bytes and back to 0 is ridiculous. Here I am at rock bottom once again, contemplating on whether or not I should join you on this challenge.

Might take a month off of gambling and aim for the lounge head award.

It's a win/win situation, get an award and have at least 6000 bytes once the award is granted because 1000 posts x 6 bytes per post = 6k bytes

You can't get UB3R anymore but you can get rOOT which is the same thing now apparently.

First, you have to get L33t and then I believe you need 100 positive reputation and then you can buy rOoT.

I was addicted to gambling CSGO skins but I only gamble money I can afford to lose. Although I never went negative gambling the skins I made thousands from it all profit.

ahh the days of csgo gambling in high school, lol I never put real money into it but I remember all my friends would get super rich and then lose it all. One time I got all the way up to like \$400 and told myself I would never gamble it (lost it the next hour btw), still painful to think how I could have had a free \$400

Very doable. I spent some bytes along the way or else I'd already be at 10k.

Technically yeah but I need to have 10k bytes by the end of the month to be able to say I reached my goal haha.

I'm sure I could hit 9k bytes by tomorrow and then get that homestretch

I think I spent around 450 bytes in total. Can't remember the exact amount but no more than that.

Crypt - December 1, 2018, 10:45 am

Whelp, November is over. I went the entire month without gambling and theoretically, I made over 10k bytes along the way but spent a few thousand. I paid 1,750 bytes for the Ace of Spades award and 450 bytes for avatar edits. I also donated some here and there to threads I liked. I now invested 7,500 bytes into the crypto game for hopefully profit and to start from the ground up again.

I'll close this thread at the end of the day and create a new one for my goals in December.

That's a lot.

If anything I would have a system; earn 1k bytes and then do 5 spins of 20 bytes ea and stop.
