Thread: [Shopify payment icons in the footer](#)

Germany69420 - November 3, 2018, 3:11 am

So I'm trying to add the icon of iDeal in my footer. (iDeal is a big payment method in the netherlands). The paypal icon was already there because paypal is a standard payment method on shopify and so it was already placed correctly. iDeal is not a standard method so I have to add the icon there by myself. This is how the paypal icon looks:

<https://gyazo.com/28ce9907a0a2915c7612f55716b44227>

I found the payment icon code in my footer.liquid code

```
Code <div class="grid__item {{ footer_column_width }}" {% if num_footer_columns == 1
%}text-center{% else %}large--text-right{% endif %}">
  <p>&copy; {{ 'now' | date: '%Y' }}, {{ shop.name | link_to: '/' }}<br></p>
  {% if section.settings.show_payment_icons %}
    {% unless shop.enabled_payment_types == empty %}
      <span class="visually-hidden">{{ 'general.payment.method' | t }}</span>
      <ul class="inline-list payment-icons">
        {% for type in shop.enabled_payment_types %}
          <li>
            {{ type | payment_type_svg_tag: class: 'icon' }}
          </li>
        {% endfor %}
      </ul>
    {% endunless %}
  {% endif %}
</div>
</div>

</div>
```

Can anyone help me get the right piece of code so it is aligned with the PayPal icon? I have already added the icon to the assets.
