Thread: [I'll build you a website for free \[HTML/CSS/JS development\]](#)

Super - November 3, 2018, 7:11 pm

Hey HF,

I'm currently building out my web development portfolio and trying to get more sites in my showcase. I'm offering a free service to a lucky few that are selected: I'll build your website for free. I can build blogs, personal portfolio websites, business websites, and pretty much anything else.

Here's a few websites I've built:<https://aimbotcalvin.com> - Website for a popular Twitch.tv streamer
<https://dynamo.surge.sh> - My business website
<https://wizardli.net> - YouTube To MP3 converter
<https://sombra.wintermute.technology> - See what hacked databases you appear in
<https://paperpad.now.sh> - Collaborative online notepad
<https://redditbrowser.surge.sh> - Reddit image browser
...and many more

Features:HTML/CSS/JS

Websites optimized for maximum load speed

Static site development (unhackable)

No wordpress shenanigans: everything is done from scratch

Responsive design, so it will look great on mobile devices too

Backend development with Node.js

Here's the application template, post it below with your details.

Code Website type (Business/Portfolio/GFX showcase/Blog/etc):

Website details (what do you want the site to look like?):

I'll select a few people with the most interesting ideas/projects and build their websites for free.

Here's an example of a site I built (screenshot):Spoiler [\(Click to View\)](#)

Website type (Business/Portfolio/GFX showcase/Blog/etc): Portfolio/GFX Showcase

Website details (what do you want the site to look like?): I enjoyed the twitch streamer's website, it seemed 'smooth'. If you could do something like that I'd be most grateful.

If this is something you're interested in taking on, PM me and let me know how we can get started.

Thanks for the opportunity!

Are you able to do a autobuy site for me? Where people can buy my products?

Millionaire Secrets - November 4, 2018, 8:44 am

I like your work, good on you ??

Yes, that's definitely do-able. I could make a sales site design from scratch, then integrate it with Selly.gg to handle payments.

PM me the details of the project and I'll help you out.

This would really help my business, I have a site but I don't have much time to put into it and do everything else I have going on.

My site is about affiliate/cpa marketing & how to properly build a business online.

So far I have 3 blogs on there and I am indexed in Google. I want my site to be fun when people visit and give enough value they can use for themselves, but I work 6 days a week and I am focusing on forums to build my presence online.

I am figuring out the best way to give people a crap load of value without asking for anything in return(of course I want to make sales down the line) while building a audience whowants to crush it 2019!

incomeonline.club is my site please check it out! I would love to work with you and in the future I am willing to be one of your clients if it all pans out well!

Looking forward to connecting

Website type (Business/Portfolio/GFX showcase/Blog/etc): business / etc

Website details (what do you want the site to look like?): The website I was looking for would be for cacti and succulents with some sort of on site auction platform if possible?

Young George - November 4, 2018, 4:41 pm

Website type (Business/Portfolio/GFX showcase/Blog/etc): Business/Store

Website details (what do you want the site to look like?): Biggest graphical demand would follow a geometric pattern. It will use designs found in Sacred Geometry and Numerology.

In essence it'll be a clothing brand site

EDIT: Depending on how amazing it turns out, I could pay you for your time as well

Very good quality of work.

If you could make website for the NGO , it will be helpful for us.

Pm sent

Thank you

Website type (Business/Portfolio/GFX showcase/Blog/etc): eSports Team Website

Website details (what do you want the site to look like?): Futuristic but sleek, with cool animations. Using the colours: Red, Black, Grey, Blue & White.

- Home (The main landing page)
- About Us (Multiple columns which I can fill out).
- Roster (Displays multiple teams and players within).
- Matches (Displays Previous, Current and upcoming matches with feature to watch live).
- Store (Sell Merch).
- Apply (Recruitment Page).

- User Area (If possible).

I was in the process of creating it but I don't have the time to do it at the moment and you would really help me out.
