Thread: [LSPDFR?](#)

ReaperHax - November 5, 2018, 11:50 am

Who has played LSPDFR? If you have not heard of it, it is a complex police modification where you get to be the good guy for once! I used to play back in the day because there is so much you can. Speed traps, chases, drug busts, you name it. Lots of additional modifications which allow you to customize the game just how you want... Feel free to share your experiences with the mod!

Holy shit, I'm definitely bookmarking this. Are there online servers using this mod or is this a single player only gig?

l0rf - November 5, 2018, 5:39 pm

I have played LSPDFR, and it is very fun for some, but can be tedious and boring for others. The installation process can take forever and crashes a lot. You will have to go onto the LSPDFR forums and youtube to find solutions to many of the problems, but in the end if you like role play games, you will love it.

If you need any help installing it just ask.

Also, if you like this, try FiveM, it is sort of like LSPDFR but multiplayer with public servers.

Mainly single player but there are online servers. They are mainly private for clans and units who are doing the roleplay but getting into that stuff can be extremely fun. I have done similar things in an Arma 3 MilSim unit where we replicate special forces operations and tactics...
