Thread: [Closest hack to Platinum Cheats?](#)

gosha - November 6, 2018, 5:46 am

Looking for a hack which is similar to Platinum Cheats? Used to use this when I hacked on the game and I would like to find a similar hack.

Close in what term? Like legit only? Features wise?

Yeah may go with Unity, had this a few years back.

Unityhacks is closer to R3Cheats imo, which used to be the best legit looking cheat.

League cheat would be an option. They're pretty close to each other in terms of detection.

Depends on what you mean exactly. As many cheats have a legit aimbot and some other quirky features.

If you are talking about for example the "cloud radar" then there isn't any other providers I believe... for now at least. ?

Mojo™ - November 6, 2018, 10:48 am

Aimware, Unity, or just about any other popular internal cheat.

Don't go with this.

Iniriua and Unity are both shit. I rather kill myself than install a boot os just to cheat in just matchmaking.
