Contract

hackforums.net/contracts.php?act...&cid=14334

Description:

So I had placed a post or the seller who sells 30\$ AGC. Then he had sent me a message that he had a 90 \$ AGC by E Whore that he would like to sell for 60 \$. It was late in the evening (in the night) had to actually sleep to go back to work next day but I thought I would close this deal because it was my first deal with AGC. In addition, we had contacted together from discord by coincidence came from the same country as me (netherlands) so we could easily talk to each other. He asked on discord if he just wanted to exchange it, but I wanted a Contract anyway because it gives me a more secure feeling. After the contract was made and I had bought him Runescap 2007 Gold (62 \$) with his PSN name: Wild4200

he had given me an Amazon gift card via HF private msg. Everything looked legit and I asked him to bring it from an Amazon website. He said that is not necessary if you want to sell it otherwise it will be activated from your account.

Because I am new in this category, I thought he was right. And he had sent it so I went to sleep and the next day I went to see if he was activated or checked. In doing so, I received a notification that it had already been activated.

Make sure to dispute the contract. Should be a button to do so on said contract.

Sorry for your loss, the guy seems very untrustworthy from just looking at his profile. I recommend that you use a middle man next time.
