Thread: [Will HackerForever get reset?](#)

emotionull - November 7, 2018, 6:26 pm

I was wondering if the current state of the game be reset?

are you asking if it will be relaunched or if the stats in the game will be reset back to zero?

PerfectStorm - November 7, 2018, 6:32 pm

What game? you mean the reputation / pop?

SIM-3257834 - November 7, 2018, 6:33 pm

I hope not, I'm almost level 5.

It's the game that Omniscient purchased ownership of recently.

Ohhhh I got you. Thanks :)

Omniscient - November 7, 2018, 7:02 pm

I don't think so. I'll speak with existing Staff/Mods at HFG (HackerForever Game) about it and see what they think.

My goal is to fix the site up, make sure it's working 100%. Then consider how to improve it and move it to a new domain as a new version. The new version + domain would have integration with HF.

Sounds good to me, I'll def move to the HF focused one once it's out. i'll keep leveling on this site now and report any bugs.

Now that I think of it in the n00b guide it says theres a timer on the infected page when you are waiting for it to install but there isn't one.

Vince - November 7, 2018, 7:15 pm

im taking it HFG will be integrated into Crews as a way to hack other crews, etc.?

I'm guessing that will be the plan, it will be interesting to see how he connects them.

I too think it is the case. It's been hinted that there will be battles to steal bytes. I think hacking into others vault(bank) will be one of the challenges.

Unkn0wnUs3r - November 7, 2018, 11:56 pm

Looks dope. Never heard of it. Playing now.

Rayner - November 8, 2018, 12:07 am

Integration with HF definitely sounds like a cool idea Omni. Looking forward to trying this out.

NoneStar - November 8, 2018, 1:39 am

Hey, long time player of hackerforever here (NoneStar) is there any news about this? can't find much but hf's side of this. Did omni post bim buying it somewhere?

that would be nice

can you include byte integration?

for example byte exchanging ect replacing money there with bytes if you reset

Rustles my jimmies!

Can't wait to see what we have in-store!

Byte integration will be a consideration of the new version on the different domain.

What game is that that you're talking about

Oh so it's like practicing hacking. That's pretty cool. But isn't that game old so things now are different or it still falls into the same stuff?

I have never played it and am refusing to look too much into it so I can give my full review and opinion on what it is and how it feels when you're at a good place with it

SIM-82498 - November 8, 2018, 11:12 pm

Oooh, I was not aware of this game. I love me a good ol' text-based game. Anyone used to play LostPowerCity?

SIM-82498 - November 9, 2018, 11:10 am

Gonna try to keep on progressing in this game if Omni believes he could revive it.

Conscious - November 12, 2018, 3:22 pm

Really old time player here!

You won't regret playing this game, especially if they revert back some changes that was made a while back by the previous owner.

This game is addicting as hell and really fun once you get a community/clan up and running.

Happy hacking guys.
