Fair enough. Was thinking about hosting a big ass party at the hotel. Then just make everyone sign up on HF

Check out the Salt Mine!! It will absolutely blow your mind, and if you're under the influence of anything it's going to be trippy as hell. It's an incredible place and supposed to do you good for going there.

I could be wrong but I don't remember being specifically told we couldn't. I was high on an edible when we got there and I know my friend brought booze but can't really remember if he had to sneak drinking it or not. It's not necessarily a party spot or anything like that, there will be some families milling around, but it's an awesome place and really cool to check out.
