Thread: [BCH HardFork](#)

Anyone on this? The possibility on getting a new coin from this from my perspective is very high, the hype about this is also very strong so well, there may be possibility to double your coins.

What are your opinions about this news?

I've never fully understood the purpose (market-side) on a hardfork. The hype tends to make me stay away from it, although it could be a very profitable short-term

Actually me neither, anything I know about this that it's not a 100% new coin. It's on the miners to decide if there's enough hash power, a new coin will appear and you will be given the same amount of the new coin. Maybe profitable, yes.

Just a bull trap to get investors to get a free coin that'll dump

I'll give it a try anyway, BCH was also a dump coin from BTC and now has a decent price

I don't think so, this is a pretty big divide in the bch community and has major players on both sides of the fork. I'd assume it will play out more like btc and bch but on a much smaller scale.

probably wise for now.

otoh with this "hashwar" happening it could be super bullish depending on what happens during it.
