Hello i am Art and i'm in deep shit recently. I have some very angry customers on PayPal after my partner neglected to fulfill his role in our business after his contact has hit hardships and subsequently dragged us down with him. I am almost \$2,000 in the red (1,900 to be closer) and need to make cash fast to refund them.

I am looking for jobs or gigs that are part time or possibly full time if they are good.

A list of my skills and experiences.

:

- Lots of gaming experience (u never know its a profitable industry)
- Beginners/intermediate experience in photography and Photoshop
- Above average creative writing skills (my teacher's words not mine)
- Semi good knowledge of Windows and Android OS (from a technical and operational standpoint i cannot code to save my life if i could i wouldn't be here)
- Beginners experience of Shopify store creation and maintenance (but not ownership)
- and other stuff

At this point i will do most jobs as long as they pay (with some exceptions i cant do everything)
Please inquiry if interested please.

Pming you.

As far as PayPal the customers will get their refunds since PayPal covers that, what you really have to worry about is paying PP back since theyll eventually send our bill to a collection agency.

Or you can get a part time/full time job and pay back the customers that way.

If your paypal doesn't have any of your banking information, you should be fine.

Do you have any experience in coding by any chance? If not, do you have any experiences with marketing? Lastly, if not either just contact me and I maybe can help you.
