Thread: [Making \\$30,000-\\$60,000 a month on Shopify](#)

lexiox901 - November 9, 2018, 10:16 am

My story, I've been on this forum for a year now. Got introduced to Affiliate Marketing/CPA and started with that, then after two months I got into drop shipping and let me tell you, it changed my life drastically. From that I was able to buy myself a Benz, provide for my family, not having to worry about anything financially, and all this at 17 years old. But that's what people like to see, it took a lot to get there and I probably lost 500-1000\$ first starting out. What really helped me the most was a couple of paid mentorships, youtube, and courses. It's hard starting taking out at first so I urge you to learn from my mistake and fast forward with the information I'm about to provide you all.

If you'd like to get into drop shipping or get a good glimpse of what it's all about feel free to shoot me a pm and I'd be happy to help.

Here's a couple tips that you should know if you're just getting into this.

1. 7-10 adsets when starting off.
2. I highly suggest you test ads on a general store first because it will save you a lot of money.
3. Start off with conversion purchase

And believe me when I say it all comes down to having a good product which isn't hard to find, profitable ads, a good product page (mind you, you can literally copy these from other stores and save yourself the work) and you can make money that easy. The reason I'm giving you guys this information and willing to help is because I've made good money off drop shipping and investing into other business ventures so my time with managing a store is very limited but I'm happy to help and do offer mentorships so if you're interested shoot me a pm and I'll be happy to help you!

Shoot me a pm and message me your Skype or discord for some screenshots and testimonials.

Since my old account got logged I can't post links or anything like that.
