is there any api ,country or https filter?

(Nov 15, 2018 04:38 AM)zupermen Wrote: [\[CITE\]](#) is there any api ,country or https filter?The proxy
lists are Worldwide, you can "generate" different lists: HTTP/HTTPS/SOCKS4/SOCKS5
I gonna add API system later, but before that i need to work on "Logs" where all generated lists
gonna be stocked for each user.
