Thread: [\[Design\] Editing Thread Title on Mobile](#)

Game - November 12, 2018, 1:43 am

I've noticed that if you have a long thread title it gets cut off in the space you have to edit it and there is no way of reaching the last 1/4 of the title to edit it. I've provided a screenshot below.

Perhaps we could extend the space for the title across the whole screen so we can see/edit the full title as it is an inconvenience to the members who regularly use HF while on the go.

Here's a screen recording: <https://i.imgur.com/n16ej3L.mp4>

Can't you just hold your finger in that text box and move the cursor yourself?

No, it won't go any further than what you can see.

I'm using an iPhone 7 at the moment.

Hold down the keyboard and you'll get some kind of trackpad thing and you'll be able to move it until the end. I have iPhone 7+

Video: <https://streamable.com/i3d9x>

It's a little buggy sometimes but it gets the job done, at least until mobile theme gets done.

Wow, I've never seen this feature. The more you know aye? Aha. Thanks.

I still think it should be sort of amended though as not all have the feature. :)
