Thread: [AsyncRAT | RAT Socket Example VB.NET C#](#)

NYANxCAT - November 12, 2018, 5:44 am

Hello guys.

I'm sharing this simple source code of my RAT, I wrote it a long time ago so I recode it again and I want to share it here to see any good feedbacks about it, I'm not that good so I will appreciate any helpful post. I just want to see if there are any bugs or mistakes.

I think the rat is ready to use, you can use it right now but you need to change IP and port.

The only features :

- Download and execute
- Remote Desktop
- Close Client
- Update Client

So again, I really need helpful feedbacks to learn from it. I'm only sharing to learn and not to help you using it maliciously.

Because members are asking for C# version I added a basic one.

Link VB.NET = <https://github.com/NYAN-x-CAT/AsyncRAT-VB.NET>

Link C# = <https://github.com/NYAN-x-CAT/AsyncRAT-C-Sharp>

Thanks for reading have a nice day/night. ?

Guess im the first post, nice to see that

Nick (Name) - November 12, 2018, 7:10 am

I know you use GitHub, why didn't you use it this time? I'm not downloading anything to view a source.

EIP - November 12, 2018, 7:30 am

Do you code in c sharp too. Your contribution is really good!

NYANxCAT - November 13, 2018, 8:56 am

Thanks all for your support!

Still waiting for feedback and suggestions...

Goldmouth - November 13, 2018, 10:57 am

Thanks again for sharing your projects. <3

Dotexe - November 13, 2018, 7:33 pm

Visual Basic in 2k18

Spoiler ([Click to View](#))

Joke aside, good contribution, but you better put this on github if you want feedback ;)

NYANxCAT - November 21, 2018, 7:04 am

Added GitHub link.

Added GitHub link.

no\$fer7u - November 21, 2018, 7:05 am

I saw this on you Github first before you posted it here :)

Skull-13 - November 21, 2018, 7:07 am

Nice sharing. Thanks a lot for this, OP.

Keep bringing us your projects.

SIM-4062753 - November 23, 2018, 12:41 pm

Great Post man and a good starter source code for making a complete RAT

GOoDMOoD - November 29, 2018, 9:16 am

Nyan you are best, that's guy from whom I start learning, when see first time his code on Github))

Nick (Name) - November 29, 2018, 12:39 pm

I can't get past his botched naming convention, his user title states it all. Not sure how it's educational as it's just a extremely simple socket client with no handshake, also zero commenting.

NYANxCAT - November 29, 2018, 6:25 pm

I would like to thank you guys for your continued support. I updated the source code.

EDIT:

I think the RAT is ready to be used right now. But I only tested on 2 clients (my pc and my laptop) However, you will notice that I disabled ThreadPool and replaced it with a task scheduler "Requests.vb" because I wanted to hold as much as clients without increasing the CPU usage whenever I send a command or receive a command.

If you feel that I'm somehow wrong because give your feedback.

hexdzn - December 1, 2018, 10:30 am

does the rat have a key logger?

maype - December 11, 2018, 2:52 am

Hey why you to begin receive and you send ping in the program launch ?

urkcoder - January 5, 2019, 10:05 am

nice things you like to do

PerfectStorm - January 8, 2019, 4:05 pm

Cool you always share stuff thanks

goldyroger - January 9, 2019, 3:07 pm

Nice sharing. Thanks a lot

LeonieHackPetaBytes2 - January 13, 2019, 10:12 am

havent tried jet but thanks for sharing!

Skofos - January 13, 2019, 6:30 pm

how about... i convert to c#? it will work?

StarZ - January 13, 2019, 10:44 pm

If you understand how to convert code directly without an online tool, probably. Most online tools are good don't get me wrong, but some things just need a human.

that's so true... man ?

mrhack3 - March 13, 2019, 5:45 am

please Boos can tell me how to add a file manger and mouse

breaker1911 - March 13, 2019, 1:02 pm

vb.net not available

but nice share.

Only C#

Ritam Pubg - July 31, 2019, 8:07 am

I saw this on you Github first before you posted

Cooooool - August 21, 2019, 1:28 pm

If anyone wants a VB socket that they could use, then NYAN CAT graciously offers up njRAT's socket. You can check it out by googling it.
