Thread: [tips for legit cheating](#)

charlie.wenthe45 - November 13, 2018, 4:31 am

I have used several cheats.. unity, lethality, zencheats, perfectaim, iniuria, satan5, singularity.. and a few more. i just cant seem to find a cheat that i like A LOT. I also might be making my configs wrong but i just want to feel like i have enough control to get better while being a little bit above my actual skill group. Any tips for using these cheats, or a different cheat i should use? i guess i just dont understand how much smoothing and rcs i should use to set up my cheats and i would love some help from anyone even if its a minimal tip, anything would be helpful since im a noob

1tap - November 13, 2018, 4:33 am

What are you looking for in a cheat?

charlie.wenthe45 - November 13, 2018, 4:36 am

(Nov 13, 2018 05:33 AM)atoo. Wrote: [\[CITE\]](#) What are you looking for in a cheat?Looking as legit as possible. I am good at hiding walls, but im shit at setting up the aim settings up make myself just look better than i actually am. In reality, i am roughly MG/MG2 but i want to look better than that without being too obvious

I would recommend playing without visuals.

I havent used the cheats u mentioned, but i would definety checkout interwebz

There are some on the forum, dont hesitate to ask for help either.

L0RE - November 13, 2018, 10:02 am

Dont use interwebz, theyre getting detected regularly. No where near good as it used to be. Try something like HexUI

SIM-3970461 - November 13, 2018, 3:01 pm

Interwebz is like aimware except aimware doesn't get detected every 2 months. L

If you want to legit cheat just try out inirua. Only thing I dislike about them is patch guard.

L0RE - November 13, 2018, 3:39 pm

Atoo has to neg rep because the cheat developer hes been deep throating for the last couple months got detected. Just go for HexUI, its cheap and more secure than lwebz . if you go for iwebz,

you're paying over \$20 to get banned

PingersAndMash - November 13, 2018, 5:12 pm

All the cheats you have said are good for legit you just need to set it up right 10 fov high smooth if blatant change fov to 8 etc

faigue11 - November 13, 2018, 10:10 pm

IMO use aimbot with very low fov with high smooth and radar hack or sound Esp .

charlie.wenthe45 - November 14, 2018, 7:38 pm

thanks bros. i guess its just down to preference. i wish like there was some general tutorial for smoothing, ect. i get the fov thing but sometimes it just looks jittery regardless

Popas - November 15, 2018, 5:55 am

Remember the key to walling in MM is to always imagine as if though you are in an overwatch case. I have been cheating on my main for round about 2 and half years now. And I am still not caught. Except alot of people think I am a pro. If you want some tips then add me on discord Creativerasheed #0821

mrtrademaster - November 15, 2018, 11:07 pm

In reality, i am roughly MG/MG2 but i want to look better than that without being too obvious If you are looking for a cheat that is legit as possible I would recommend BlackSector. Nothing to complicated just a few tweeks to the cheat and you should be able to reach global in no time. If you want I can give you my legit config to use.

Use backtrack at a very low ms, like 50-100. No visuals. Tiny bit of that extra assistance is perfect. Looks super legit.

I haven't cheated in a while so not sure which provider to go to nowadays, but this was always my config.

200ms plus lag exploit and shoot niggaz round corners ez win

Divine Intellect - November 19, 2018, 5:54 am

just use aimware with backtracking any retard can do it and never get banned..

netpulse - November 19, 2018, 9:00 am

Its definitely your configs, since unity is actually the best legit cheat atm.

(Nov 19, 2018 06:54 AM)Kyouka Wrote: [\[CITE\]](#) just use aimware with backtracking any retard can do it and never get banned..

When using AW you're not really worried about OW, since its mostly being hit by VAC itself. Also, its pretty shit for legit use.

If you want to legit cheat just try out inirua. Only thing I dislike about them is patch guard. i agree with you, interwebz is shit, also i don't get why such kids have to be so rude with -rep just cause you're trying to help out a guy in a way that doesn't increase his pocket

Pyro - November 20, 2018, 9:45 am

Legit cheating ... Not sure if OP is trolling or if he's serious

gianni - November 20, 2018, 10:02 am

Looking like you are a legit player but using cheats? Not that hard of a concept to understand. 99% of the people in the cheating community understand what this means.

yungshady - November 21, 2018, 6:44 am

just use hexui i have tried 20+ public (p2c) and i can promise you will never get ow banned with right settings
