Thread: ['Megumin' || Typography, scrollworks, signature](#)

Virtus_Graphics - November 14, 2018, 3:34 am

Not much to say I guess, several things that could be better. Took a long time to finish as I have been going on with this thing on and off.

Do you see anything that bugs you? Something that could be better? Please do say it, so I can understand how people think, what they notice, etc.

Made so someone called Megumin can use it, hence the colour choice (postbit style).

Mister Slyther - November 14, 2018, 6:05 am

I think is great work, 9/10. I'm no expert with typography but as a designer, I think this is well constructed.

I hope whoever commissioned you has paid you well because work like this can easily be sold for more than \$500 and 20k+ if it's some company and even more than that.

Thanks, yeah I do charge around \$500 IRL, but I believe I need to get better first if I want charge more.

This one was a practice piece though, so I just gave it to the guy. The typography wasn't all that much work, compared to the rest anyway.

Anything weird you see that sticks out? Details that you think were done poorly?
I want something to work on. :)
