DOES THAT MEAN EVERYONE HERE ARE ALWAYS LOOKING FOR WHAT TO GAIN AND NOT WHAT TO GIVE OUT.

SPOKE TO SOME PPL I KNOW THEY HAVE THEY JUST KEEP SAYING SORRY..ITS SICKENING

IF ANYONE IS GOING THROUGH THIS PLEASE COMMENT

Danm this is hacking forum .. or not ?Typically you are not supposed to discuss programs that are designed for malicious use and fraud.

this is not right. this are hacking tools and not actually meant for fraud. all hack tools including a simple stealer can be used for fraud too

same thing with keyloggers etc. this is hacking forum and the warning of total user responsibility should be forewarned.

also we have TOS to advice users not to use for fraud. exploits, keyloggers, stealers, rats etc are all hack tools and can also be used for fraud , it all depends on the user not to use for fraud. all

hacking tools are malicious !

Simple HF TOS will never hold up in court. Look at Nanocore and KFC Watermelon. They always had it in their TOS yet were arrested. A TOS without any legality to back it up is just some words you wrote down. I agree anything can be used for fraud but some programs have specific features for this and hence why it is banned to talk about them.
