Thread: [How to create chat bots? \(or more specifically, chat bots for Amino\)](#)

Moomoomoomoo - November 14, 2018, 12:38 pm

Does anyone know how to create chat bots, for the app Amino? If so, I'd very much appreciate it for an explanation.

I want the bot to be able to respond to certain words. And if possible, I'd like it to save the messages conversed between the bot, use RNG texts, calculate mathematical equations, and extract data from amino blogs to use for chatting. (I would put this bot to good use in a group chat.)
