Thread: [\[Bug\] Quote/Reply no longer works on mobile](#)

Kill Joy - November 15, 2018, 10:53 am

I noticed this yesterday. Using the quote button and reply button on mobile does not work for me anymore. What about anyone else?

iOS - Google Chrome.

Ok even when clicking edit now, all of the text in the box has been cleared.

I've noticed this on posts and PMs.

SIM-3257834 - November 15, 2018, 10:56 am

Also happens on Samsung internet browser.

Omniscient - November 15, 2018, 11:51 am

You may have bad cached JS. We did stuff this week which screwed up JS but we fixed it. You could have bad cache though. Try to clear it please. We believe it's all fixed.

That's the bad JS page.

This is the file you want to clear.
