Thread: [Theocritus' Ebook Review for "Daily Bank" by .Elysium.](#)

Theocritus - November 17, 2018, 1:30 am

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [DAILY BANK | PRIVATE METHODS | EARN THOUSANDS MONTHLY WITH MINIMAL EFFORT](#) by ".Elysium."

This eBook consists of 9 methods and 22 pages.

The grammar and structure of this eBook are not bad, but it could see some improvement. Grammar wise it looks overall clean.

As there are a good number of methods in here, I will talk about each of them in chronological order below.

Method 1

This is one of the Spotify methods that have been floating around here for a bit. It is not a brand-new method or anything, but it can get you free premium which you can use yourself as well as make money with by reselling etc. This method is also included in Hydra's Spotify eBook as well, you can check out that review [HERE](#). I have used similar methods to this one to make \$1000s of dollars the last 6 months.

Method 2

This is one of the few methods in this eBook that I have not seen before on HF. You will be abusing a certain system to get something for free which you can, in turn, sell to others after you have obtained it. This could work well as a semi-autopilot method by having the items for sale on auto-buy and advertising it on various platforms.

Method 3

This is a method that has been around a good while and is included in many other eBooks here on HF. You will be reselling a certain service on sites like Fiverr for a much higher price than what you obtained it for. Nothing too complex about this method, just resell this service and make money.

Method 4

This is another method where you are to resell a certain item for a much higher price than what you got it at. This item cannot be resold on many sites as you will get banned for selling it quite quickly. This method is best used if you have local sites you can sell the item on for a very nice profit per unit. OP also includes a supplier where you can get this product for cheap from. This is a method I have seen a few times on HF before, but it is not common in most eBooks I have seen.

Method 5

This is another method that I have seen a decent amount on HF already. You will be using crypto to buy certain digital goods on a certain website which you can get much cheaper with crypto like BTC, then making money by reselling said digital item or using said digital item to make money with by

itself. This method can work decently but personally, I have not had the best success with it in the past.

Method 6

This is also a method I have seen in other eBooks before but only a few times, so it is not that common. Here you will be offering a certain service to individuals/businesses and just make money by reselling a service you can get much cheaper yourself. The potential in scaling and earning with this is one of the better ones in this eBook in my opinion.

Method 7

Again, this is another reselling method where you will resell a digital item on places like eBay etc. this method is very common and included in many eBooks here on HF. The unique thing about this method is the supplier OP includes and the low price the supplier offers for the item you will resell.

Method 8

This is a method I have not really seen in other eBooks on HF before but a method that some of you have probably already thought about. You will be once again reselling a service to someone. You will find people looking for this and similar services on various websites then, in turn, go to other websites to hire someone else at a cheaper price to make the item the 1st party wants. Then all you do is keep the profit for doing no real work.

Method 9

The last method included in this eBook is another that has been in a good number of other eBooks here on HF before. You will be getting licenses for certain products for free and then, in turn, resell it to people for a profit. So yes, it is another method based on selling. This can be a good method as you invest nothing and can get a good profit from it fairly fast without much work involved.

This is an eBook with a good overall collection of methods that can indeed make you a good amount of money. Personally, I have used multiple of these methods in the past 6 months and made well over \$10k with them so far. So, from personal experience, I can say some of these methods work 100% as I have used them myself for an extended period of time. Now, all of these methods may not work for you personally, but I am sure at least a few of them will make you money. These methods are as said a collection and none of them have a lot of detail put in on how to execute them properly. This is more of a general guide eBook where you are shown where the cookie jar is, and all you need to do is reach into the cupboard, get it out, put it on the table and open it to reveal all the treasures within. If you are someone with no imagination and need a lot of detailed instructions to get anywhere this eBook will have limited use for you.

I also want to mention that the screenshots and images used in this eBook are overall good and help visualize the entire process.

The price point of this eBook I feel is also fair and can be easily enough justified due to all the methods you can utilize within. Yes, a lot of these methods are already in other eBooks and are not exactly private or original, to say the least, but they can work well, and make you good money. On top of this, it is all included in one package, meaning you don't have to get 10 different eBooks to get all these methods, you can get it all in one. That being said, this eBook will, of course, have limited value to the people like me, who have a lot of eBooks already and more or less know all the methods in here from before.

Final Thoughts

This eBook I believe will be well worth it for all the people that are newer to HF or online money

making and wants to get a general guide on how to start out. If you are like me then you probably don't need this eBook as you will already know most of its contents already. As an overall product though this gets a thumbs up from me based on the value and contents within.
