Thread: [Strange dreams with murders](#)

Tsach3vTP - November 18, 2018, 11:39 am

Ok I got obsessed with dreaming and sh*t. A few months ago i made a thread about something with dreaming and I mentioned how every time something good like sex is about to happen i wake up. I looked it up on the internet and a few people said that you can only experience things in your dreams that you've experienced in real life.

It's been a few weeks now that I dream everyday and every second day I dream about murdering someone and no I do not wake up I do murder them. So by what people have said in the other forums about the sex thing , then I am a serial killer irl...

Does anyone else have unusual dreams about murders and shit?

Truth is, people have no fucking clue about 2 things - what happens after we die and how dreams are working

There are some dream decoders that effectively "decode" what your dream means. Google it.

I only have sex in my dreams, like I don't dream about anything else lol

I believe that whatever you dream, you subconsciously suppress in yourself somehow and that's where your dreams come from. For example there are people that have some kind of mental illness that causes them nightmares. I believe it's because they're in a "dark place" and their mind is set to really just think about bad things happening maybe? Idk if I'm making sense, I hope you get it.

However I wouldn't believe in those kind of books that tell you the meaning of your dream, I think it's bs.

About the thing that you haven't experienced sex- I think they meant it in a different way. You can dream about things that you haven't experiecd but you must have seen it at least. Just look at little babies, they dream only about what had happen in their day/days. :)

I also have weird dreams from time to time. I prefer not to talk about the bad ones tho, it just makes me feel weird that it's out in the world.

Tbh I dream a lot of fucked up things,some nights I even make more than 5 dreams (all different) and remind everything of them.

I don't really care tho

If I tell you my nightmares or even better if you get one of them you would not like to have it again for sure. Just do not think over about it.

Getting murdered or just dying?

Sigmund Freud tried to explain the logic behind the latter. but yeah, there's no afterlife. ?

Your brain can emulate stuff. I've never been stabbed, but I could feel it in my dreams.

We don't know why we need to sleep, let alone why we dream or if they mean anything.

I've spent a lot of time thinking about this, I taught myself to lucid dream in the hope of finding answers.

My advice is leave it all well enough alone. Once you start playing with you're dreams reality gets weird.

I've learnt my lessons hopefully you can learn from mine.
