I haven't gotten a chance to try out any of the methods, but I will come back and update the post in a few days when I do. I purchased the Elite Package, and I highly recommend others do as well. It has everything you need, from mass spreading to monetization. Just by reading the guide, there is potential to make some serious cash from this. And no, I don't mean getting your bots to click on ad.fly links and give you a couple cents. You can make some real money with this if you are capable .

I personally wouldn't recommend this guide if you aren't at least somewhat experienced with RAT's and privacy, for a couple reasons that I won't get into here. Don't take this as a negative, the guide is well written, detailed, and concise.

After reading the guide, I was giggling to myself in excitement. That's how much potential there is in this guide. I can't wait to try this out. I'm gonna leave a vouch right off the bat.

The method contains multiple private, unsaturated, and HQ methods for spreading and cashing out, each have their own pros and cons.

If you use this product, the private group and follow OPs specific monetization instructions, you're guaranteed success.

The private group is extremely resourceful, and everyone in the team is very kind and helpful. Within two hours, I had nearly 300 slaves (50 of which came with the package though), and had already made \$180! I will update this post in a week, but by the way it looks now I am expecting to make a lot more than that each day.

I am generally weary of HF products but Fzsix and his team have proven themselves to be in it for the long run, and excellent mentors. Still amazed that I only paid 50 for this. The bonus slaves with the Elite package came in quick and are a good mix between Europe, North America and Asia.

The only reason it might fail is because of the buyer's laziness and that's not something a seller should be held guilty for. I rate this 10/10 for the incredible content, resources, insane support and the degree of knowledge the seller has. It contains very effective ideas and it is overall a very very nice system. Would recommend anyone looking for bots and money to purchase this guide. Thanks for reading and have a good day. ?

I have a question!
Please post directly below.

Investment?
No major investment required!

With Elite and Gold packages, when will the slaves be delivered?
Generally within two hours.

Are these methods saturated?
No. These are private methods. They are absolutely guaranteed to bring results.

For clarification, what is this product going to help me with?
This product includes our private techniques to spread your file to a massive audience and private methods to monetize the bots. We have personally made six figures with these methods.

Setup time?
Setup time should not take very long, however you can always put more work in for better results.

Does the monetization method include...
No ads, surveys, silent mining or any public method. You will not guess it. It is 100% private and has proven it's immense success.

You could potentially make 10-20K a month with this your first month, and afterwards make a lot more.

Most of the methods are not legal but there are legal ways to do it :)

These methods are completely private. I also compromised with that user because he didn't get the correct file, and I gave him other methods that he found satisfactory.

Given that this involves the spreading of a potentially malicious file, I'll let you answer that last question yourself.

You must understand that a private stub takes a considerable amount of time to make, and even cost upwards of \$200-\$300. If you want your bots without waiting for the crypted stub, I can do that immediately, but you chose to wait for private stub.

They are more ideas than methods, because no specific tools are mentioned. Following my disappointment, I made a refund request to the seller, he refused by offering me to try these method saturated for 30 days and insisted on me participating in a private mentoring. I did not want to disturb him more time with this mentoring, but he insisted so much that I finally gave in. That's when he gave me a totally illegal method in addition to being very unrealistic which consists of to send payloads to ICO's founders. At that moment, I told him that I refuse to be part of this kind of scam, but he felt that he had sent his product and that I am no longer able to ask for a refund. He then strafed me screenshot proof with amounts that never exceeds about ten dollars. Friends I do not recommend this product. good luck to everyone !

Your mentor was bad, you tried to infect me with # and you put links to your ebook macro sploit services that do not work well (service from another member of yours, the user perfect storm), most positive reviews are from them and others that I explain below... When I told you that your method is saturated you offered to give me all your ebooks if I gave positive reviews in all your threads (I have the proofs),

you also offer a crypta and bots, then not having to reimburse or get positive reviews (good strategy).

I'm going to capture everything and I'll show it to everyone.
You should have given me back my money when I asked for it, but I gave you a chance and you tried to infect me. But you failed and then you started giving me long.
You have your deception very well mounted but you do not fool me.

Very careful this person is able to infect their own clients.

Regardless of whether the posts are there or not, my stance remains the same in that I don't ask that user to post those things. I often give him free or discounted copies, and what he chooses to write is up to his discretion. I am responsible for what I say and do, not for what he says and does.

I have a question!

Please post directly below.

Investment?

No major investment required!

With Elite and Gold packages, when will the slaves be delivered?

Generally within two hours.

Are these methods saturated?

No. These are private methods. They are absolutely guaranteed to bring results.

For clarification, what is this product going to help me with?

This product includes our private techniques to spread your file to a massive audience and private methods to monetize the bots. We have personally made six figures with these methods.

Setup time?

Setup time should not take very long, however you can always put more work in for better results.

Does the monetization method include...

No ads, surveys, silent mining or any public method. You will not guess it. It is 100% private and has proven it's immense success.

With this is enough for others to know that they can not trust you, in addition the massive sending of emails and trying to trick others to download and run your malware are not private methods, and your mentory with me has been terrible.

I have the right to a REFUND and I also have the right to REMIND you until I receive it.

I'll accept that you're dissatisfied, that's fine. What I will not accept is your claim that I am trying to infect people with malware. The ONLY claim that's been made with that has been reversed by the person that made it. Keep bumping for me.

Everything I said is true, when you gave me the file infected with # (I wonder what they thought about "breaking-security.net" of this) a week ago I had 10 detections in total virus and it had never been scanned there, today it has 37 detections.

If your intention was not to infect me, I do not know what you intended to send me an infected program that does not even work.

I know you'll never recognize it, just give me back my money and I'll forget about you.

Look mate, the two users that you have responded to have registered today and only have 1 or 2 messages.

It seems very suspicious, possibly using multiple accounts.

Man.. it sucks to see the way you're handling these accusations. From your activity on the forums as of late, I thought you were going to take over the market for these types of products.

There is nothing I can do regarding them. Market takeover still imminent, they are bumping my threads and increasing traffic to my Selly.

KasperMisr - December 7, 2018, 7:41 am

do you consider mass email spam method as private ?

hollyshit , it's common method and my mother (60 years old) know this method

jerryspring - December 7, 2018, 8:02 am

How much money can be made using this method?

Fzsix RETURN ME MY MONEY!!!

Very careful with Fzsix, you sell a method SATURATED, will try to INFECT you and of course do NOT REIMBURSE.

The positive reviews are from your partners and other customers to whom you offer your other free ebooks or something else.

There are screenshots that prove what I say:

<https://hackforums.net/showthread.php?tid=5908080&pid=57979064#pid57979064>

Take this seriously and do not let it deceive you or manipulate you with your good words and your ticks.
