Thread: [\[Telegram\] Free Daily Cryptocurrency Signals - Market Updates - News Articles](#)

bobismyname - November 19, 2018, 3:16 pm

Recently I have been posting a lot on my trading view account, but I wanted a more central area for not only charts but also relevant news, tweets, speculation, etc. I have decided to make a telegram channel for this purpose which I intend to post in daily.

What you can find on the telegram channel:

- Free analysis on Bitcoin or other coins on a daily basis.
- Linking to interesting and important news articles surrounding cryptocurrency.
- Updates on major events or market movement that occurs.
- Resources, educational videos on how to trade, etc. that I have made on my Youtube channel / Medium blog.

Here you can join our [cryptocurrency telegram channel](#).

Some of our recent successes:

Not really, there are leverage trade opportunities and coins that are still going up. Shorting has been extremely profitable recently.

Hey! I see you're using the Telegram / discord groups as a way to marketing your other subscription services... Have you ever thought about charging for access to your Telegram/Discord? Maybe just a low monthly fee to make sure people are engaged? I created a tool that makes it really easy to do so (chatgroup.io) I'd love to get your feedback

I do see your point and I think that is a cool concept, however I intend on my free content on discord / telegram to be completely free. I do offer premium services, but I really enjoy the community aspect around cryptocurrency so I want to make sure it is accessible to people who can't afford a subscription. Therefore I don't think I'm interested in charging even low fees, but I appreciate the offer!
