Thread: [Scammed by colbert_denning aka: \[Black Lives Matter ~\] \[uid=4040649\] for 24\\$](#)

Contract: <https://hackforums.net/contracts.php?action=view&cid=15720>

My eth for his btc, rate 1:1.

Epilogue

I assumed this new contract system would be rather safe because scammers would have to buy upgrade (their acc) to exchange .. Well that is until I saw that they can buy leet at 15\$ for 6 month per account. I know I know, the red flags on the trust scan, I am only to blame for this. I guess I felt a false security feeling after reading multiple threads about enforcing those contract and how it would make things better for users .. and I overlooked the rule #1, trust no body. Lesson learnt, lucky for me it's only few bucks..

That is truly messed up. Just give him back the money and make a change in life- for the better.

Lmao, okay now I'm certain on my stance for tighter restrictions on the CE section or the complete removal of it.

For what? \$24? Is it really worth scamming him for \$24?

? Yes indeed! I just noticed this.

He pays for l33t then scams for something less than l33t. Totally not a waste of time.

Odd enough , you can now buy l33t for 6 months at 15\$ (any crypto)

<https://hackforums.net/upgrade.php>

Still, he didn't make a huge profit ..

Petty as shit!

Karma will do justice.
