Is a weeb someone who likes anime? I have seen it being used before, and it seem negative. Tell me what you think.

I've seen some people telling how "weeaboo" usually means ruined by the Internet. The pop culture definition is a non-Japanese being obsessed with Japanese culture and shunning their own.

I guess you could also look into words like "otaku".

Tazxy - December 31, 2018, 6:17 am

This is the definition of a weeb. A weeb is a person that's not Japanese, but wishes they were. they're obsessed with Japanese culture. they integrate Japanese words into every day language. they are brony tier disgusting.

People who obnoxiously worship and defend anything Japanese I guess

Weebs is the term used exclusively for anime, manga, VN and LN fans. While otaku is a person that's passionately obsesed with something even train.
