Thread: [VPS for xmrig-proxy & xmr-node-proxy](#)

amnesia02 - November 21, 2018, 4:18 pm

Hey guys. I have a question i couldn't find answer I searched a lot.

I want to setup XRP or XNP on VPS.

Should I buy some high performance offshore, bulletproof etc. VPS to setup it or onshore 5\$ VPS will be OK?

I am asking because somebody wrote:

"Just get any offshore Ubuntu VPS with 2GB ram and it will do the job" and other users sad "Just buy cheap 5\$ VPS"

and now I am confused ? .

Thank you ?!

PM'd you with some more info.

Zan0n - November 22, 2018, 9:55 pm

Any VPS should do with xmrig-proxy. no need high end server. It used small resources. unless you mining on it.
