Thread: [afk guthans patched?](#)

Fortnite - November 22, 2018, 1:02 am

So I left my laptop on last night at NMZ on custom normal as this YT guide told me to:
https://www.youtube.com/watch?v=266dC_6jinM

I set an auto clicker to every 5 mins to sip my super combat. Woke up this morning and I was only killing them for maybe 30/40 mins before something happened.. Is guthans patched or something? Is there another way to afk train?

Been patched a long time ago.
You have to interact every so often with the client now.

It was patched 3 years ago lol. You can still afk for like 20 mins without clicking.

Then it wasn't set up properly.

It would give him max 20 mins interaction time?

Clicking on the client counts as interaction?
