Please post questions about Anon Proxy Tool in its thread.

Anyways.

Delivery is instant via email.

It is HWID locked, however you can change the hwid yourself from your webpanel.

Yes, some features are dependent on me. I host a vps that does the proxy checking. I also pay for private proxys that you get free.

Yes, you can add your own sources.

Updates will not stop anytime soon. I won't say never as no one knows what lies ahead.

Hi, basically I'm looking for an Indian VPN or RDP to tunnel all network traffic through that.

Does this VPN app do that? I mean tunnels all in-out connections via the connected proxy?

Do you use paid proxies or free ones?

Is this essentially a VPN, or a Proxy connector app?

Does it auto-reconnect if the conn drops?

Thank you in advance.

No, sorry.

Reason there is no blacklist checker is that there are a lot of blacklists and many sites use their own. It would take a huge amount of time to check each IP with each blacklist and each site.

Thanks

You may use this VPN for anything you want.

Thanks

I fully understand old service had this feature only with a click meaning, it doesn't check lets say all 5000 ips only the single one which i want to use right now.

There was one page can't remember which checked ip for 20-40 blacklists, when use there api it is only one request for you.

I'll likely buy this tomorrow.

Thanks in advance. ?

I don't mean to be rude but I have just bought the software, tried private proxy and all I can say is, they are awful. They are either not working or blacklisted if working. They also don't sort the private socks respective to geolocation e.g states, cities, zip codes so you have to figure it all out on your own.

You did not buy this tool. Please post on the correct thread.

Thanks

No, you can not auto change every 1 min but its 1 click to change to a new ip.

Thousands of proxies, also they refresh every 2 hours with new proxies.

Thanks

i'll buy it tomorrow, thanks to you :)

does this bypass google search ban?

if i make many searches on google in 1min, i get banned.

does this entire proxy system bypass it/?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
