Thread: [Samaritans | Network Security Division | Recruitment | Apply Today!](#)

Business - November 25, 2018, 10:12 am

The Network Security Division of Samaritans is seeking active members with a desire to learn and teach others. We work as a team to provide quality tutorials and content for the community. This is an excellent opportunity for anyone that wishes to dive in the Hack Forums community while expanding their knowledge and skillset. Members will be expected to participate in ongoing group activities and projects. Projects are designed to fit the individual, so don't be afraid to apply! We are a chatty bunch that's always willing to help out.

Comments, questions, queries, conundrums, or confusions can be sent to either myself or SysAdmin.

Pronouncer - November 25, 2018, 10:13 am

Nice to see the Mentors step up and take charge. Good luck with your divisions guys, if anyone else has any questions feel free to ask

realsunjester - November 25, 2018, 10:16 am

what quality tutorials have samaritans produced? do you have links?

Business - November 25, 2018, 10:19 am

(Nov 25, 2018 11:16 AM)realsunjester Wrote: [CITE](#) what quality tutorials have samaritans

produced? do you have links?The division is being revitalized right now, hence the recruitment. I posted one the other day. This is the kind of threads we will be producing once we have active members:

<https://hackforums.net/showthread.php?tid=5911396>

SysAdmin - November 25, 2018, 11:05 am

Good luck to everyone applying, can't wait to see what kind of members we're getting!

S3AR - November 25, 2018, 11:49 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

GFX Designs. I have also my service on HF, im doing HQ designs.

What topic(s) do you want to learn about most?

Currently im doing only designs, but im opened to new skillset.

Would you be willing to complete assignments on various topics?

Yeah

Are you willing to teach others on a regular basis?

Sure, also im looking to do some free gfx for members.

Why do you want to join Samaritans?

Im looking to do some FREE GFX Services for the members of the group, also maybe some idea about member of the month and he can win the fre gfx from me, HQ.

Tell us a bit about yourself!

Im gfx designer there on HF and just doing business. Im doing any kind of designs, always HQ.

xMannyG - November 25, 2018, 1:07 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Network Security/ Ethical Network Hacking

What topic(s) do you want to learn about most?

Currently studying for my CCNA and CEH Exams and want to learn everything network security wise such as protecting against attacks such as ARP Poisoning and ect.

Would you be willing to complete assignments on various topics?

Yes, I would love to give back to the community and use any free time to assist with any information/ work to be done.

Are you willing to teach others on a regular basis?

Yes, I believe in the idea of giving back to the community. If I am able to pick up on a section I would like to teach others an easier/better way to overcome that hurdle.

Why do you want to join Samaritans?

I currently work in IT and plan to move into the network security division at work and would love to pickup any real life scenarios and help with any information. Teaching others helps me correct my own mistakes.

Tell us a bit about yourself!

I am 22 and work as a Security Analyst at my work, I was offered a promotion with the idea that i would obtain additional certifications and knowledge to put back into my workspace. This group looks to be a good step in the door towards learning more.

Anis_WAN - November 26, 2018, 1:43 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I'm into Cyber Security - Web and Network Penetration Testing. I'm also good with cloud computing IBM Bluemix and Aws

What topic(s) do you want to learn about most?

Buffer overflows, In depth Network Penetration Testing, Hardware hacking, Reverse engineering, IOT security etc

Would you be willing to complete assignments on various topics?

I'm more than willing. I will immerse myself into the group

Are you willing to teach others on a regular basis?

It's through Teaching Perfection is crafted

Why do you want to join Samaritans?

I have been searching for a community where we can share, discuss, learn, guide each other to become the best of ourself

Tell us a bit about yourself!

I have 4 years professional experience in information security, I'm a big dreamer a motivator, and i barely give up.

deathless_wolf - November 26, 2018, 4:51 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I'm still fairly new to all of this but i guess data collection is what I'm best at as of right now.

What topic(s) do you want to learn about most?

I am a do it all kind of person so a bit of everything!

Would you be willing to complete assignments on various topics?

As long as i know how to complete them or will learn how to complete them then yes.

Are you willing to teach others on a regular basis?

If i have anything worth teaching.

Why do you want to join Samaritans?

I need a group to help give structure to my learning process, meeting talented people also helps give inspiration!

Tell us a bit about yourself!

Im a jack of all trades, someone who loves to keep busy. I absolutely love video games. I can do magic tricks, play several instruments and im handy with a balisong.

Business - November 27, 2018, 1:27 pm

Once a few more applications come in, I'll start accepting members.

Unknown - November 28, 2018, 10:47 pm

Nice to see we have some new applicants.

Looking forward to possibly seeing new faces in the group

Purest. - November 29, 2018, 4:51 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Infosec in general would constitute that field, I have been dabbling in it for a couple of years now and have been hooked ever since.

What topic(s) do you want to learn about most?

Wireless/RF Hacking

Would you be willing to complete assignments on various topics?

Depends on the assignments.

Are you willing to teach others on a regular basis?

No.

Why do you want to join Samaritans?

In all my years on HF, I have never really been a part of a group and I would like to contribute to the community for teaching me alot and helping me grow, this group seems like a good choice.

Tell us a bit about yourself!

I'm 16, I do bug bounties sometimes, I have an OSCP and CEH.

Business - December 1, 2018, 2:08 am

Let's see some more applications! We accept users of all skill levels, don't be afraid to apply.

SIM-3889772 - December 1, 2018, 10:52 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Cyber Securiry and Network forensics as I literally have a degree in it

What topic(s) do you want to learn about most?

Expanding on my reverse engineering, malware forensics, and programming

Would you be willing to complete assignments on various topics?

Of course it time alots

Are you willing to teach others on a regular basis?

Yes

Why do you want to join Samaritans?

Can only expand and become an expert through teaching and learning other methods

Tell us a bit about yourself!

I drive very fast cars, exchange a ton of bitcoin, and love my dogs.

?BowmanBot? - December 2, 2018, 6:58 pm

Our general recruitment is now closed, we are still accepting applications for this division. Thank you and good luck!

telmutraider - December 2, 2018, 7:47 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Cloud Infrastructure, Network Security, and Web Application Security. Migrate all the stuff companies have on-premise to the cloud. Secure their web apps and improve network design during the process. 7 years experience.

What topic(s) do you want to learn about most?

How to secure servers / web apps against the hacks and exploits that keep on trucking and growing everyday. New categories of things I don't even know about.

Would you be willing to complete assignments on various topics?

Yes, absolutely.

Are you willing to teach others on a regular basis?

Yes, and will enjoy doing so.

Why do you want to join Samaritans?

Being part of a group that does good work, sharpening network / web security skills, seeing what I'm capable of.

Tell us a bit about yourself!

I only buy physical books to read because I look at the computer screen for so much during the day. I contribute a lot to Open Source. Grew up in an old factory town that had seen better days, but it was probably the best urbex you could ask for.

elterco - December 2, 2018, 11:23 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Marketing, social media, oratory, AV production

What topic(s) do you want to learn about most?

RAT, Spread, Seo

Would you be willing to complete assignments on various topics?

I'll be honor to cooperate with the group

Are you willing to teach others on a regular basis?

Yes I'm

Why do you want to join Samaritans?

It seems like a pro crew. I know business's work and I want to help the HF community which give me a lot

Tell us a bit about yourself!

I love to trade, chat and talk. I'm practice Archery because it keeps me focus

phr3ak_ - December 5, 2018, 11:06 am

Hey mate, Nice to see new recruitment going on. Would love to see some great minds coming up. Ought to say I haven't been long enough to be a part of Samaritans but ought to say they are simply HQ friendly guys. I am glad to be part of it.

Best of luck to everyone.

Blakerebelrolls - December 6, 2018, 12:32 pm

What is this group all about? like i understand that it's about sharing knowledge with others, but can you expand on that?

plague_infosec - December 8, 2018, 6:33 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

social engineering/Basic web security.

What topic(s) do you want to learn about most?

Don't really have a list.

Would you be willing to complete assignments on various topics?

If I feel it is worth doing.

Are you willing to teach others on a regular basis?

If i have something to teach or show, then yes.

Why do you want to join Samaritans?

I have been doing this for a bit, but i get bored doing it by myself. I get more benefits from sharing and working with others.

Tell us a bit about yourself!

I am in the military. I love my work, but I hate working alone. I have a few servers for basic use, and several other tools both home made and pro. even with all this, I still find myself with a lack of jobs and projects.

BlackFriday69er - December 9, 2018, 2:48 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

C# programming/ coding botnets and key loggers

What topic(s) do you want to learn about most?

Anything programme based, (or not, i just want to learn) maybe even learn a few more languages, so that i aint just stuck in the c panel, in the hope to brooding my horizons. (I always want to lean more)

Would you be willing to complete assignments on various topics?

Yes, I would love to give back to the community and use any free time to assist with any information/ work to be done.

Are you willing to teach others on a regular basis?

Yes, i want to be a big part of the communtiy and to help others that are less fortunate or just need a helping hand, so i will do whatever i can wherever i can to help those that need it

Why do you want to join Samaritans?

Ive been getting into programming recently, and i want to be able to learn new skills, but i dont want to use them to do any harm or bad to others though, so i believe that this is the best group on HF for this

Tell us a bit about yourself!

I am 36, ive been into computers majority of my life, but am only starting to get to grips of what you

can really truly do with them, and as my search continues, i want to learn more, and i want to put this into practice. ive always been a caring person and always try to help those that need it. (i once trained to be a real life Samaritan just so that i could help those less fortunate and that just need a shoulder to cry on).

splutter - December 16, 2018, 2:35 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I wouldn't consider myself an expert but I specialize in Windows malware (development and analysis). I research Windows internals and have the ability to reverse engineer assembly code.

What topic(s) do you want to learn about most?

Besides what I specialize in, I wish to dig deeper into digital forensics and have considerations to start learning Windows exploitation and penetration testing.

Would you be willing to complete assignments on various topics?

It depends on what the topics are and how interested I am, otherwise I constantly keep myself busy with personal projects to further develop my skillsets and knowledge.

Are you willing to teach others on a regular basis?

I am quite willing to teach others if they show desire to learn, otherwise I would rather focus my efforts elsewhere. It also depends on how regular, I won't be making tutorials every other week but maybe once a month and in what kind of format. I've written technical research papers before but I've found that I really dislike the resources I have to put into making one. If the topics I teach are small in size and less technical, perhaps I can make them more frequent. I'd very much prefer a casual chat about things I know.

Why do you want to join Samaritans?

I'm always up and moving around looking for communities to join from which to learn and maybe teach.

Tell us a bit about yourself!

Not much to talk about besides me being a no life trying to git gud.

CyberError - December 16, 2018, 5:53 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Networking , Rats , Computer Build , Vpn's & Proxies , SE

What topic(s) do you want to learn about most?

Networking and programming as much as i can

Would you be willing to complete assignments on various topics?

Yes

Are you willing to teach others on a regular basis?

Yeah i try my best

Why do you want to join Samaritans?

To Join Learn and share knowledge

Tell us a bit about yourself!

Studying CCIE , Already Learned CCNA and net+

bukaw - December 17, 2018, 7:43 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

writing malware, can bypass almost AV, have a basic understanding of web application attack. Manages a botnet system, each exploiting some basic sql errors, xss, lfi, rfi, directory traversal.

What topic(s) do you want to learn about most?

Bug hunting, especially, web browsers rce exploit and sandbox bypass.

Would you be willing to complete assignments on various topics?

Depends on the assignments.

Are you willing to teach others on a regular basis?

Yes.

Why do you want to join Samaritans?

Learn and share to improve my knowledge, make friends with others. I have never been a part of any group and I would like to contribute to the community. this group seems like a good choice for me.

Tell us a bit about yourself!

I'm 28, writing malwares and do bug bounties sometimes.

syko211 - December 19, 2018, 7:46 pm

What topic(s) do you want to learn about most?

Coding, Cloud Vulnerabilities, and evading AV.

Would you be willing to complete assignments on various topics?

Yes, I willing complete any assignment giving to me, to the best of my ability.

Are you willing to teach others on a regular basis?

Personally, I learn as I go. There is something to learn everyday! I'm willing to share my knowledge with anyone wanting to hear it, at the same time as im learning it.

Why do you want to join Samaritans?

Looking for a group of like minded individuals that I can interact with on the same level.

Tell us a bit about yourself!

Without giving up to much info, I was born way the internet went big!. I used to hack the library local database, and have random shit ordered to random card holders. Back then they used to charge you like a \$1 an order...not much, but was still fun. When I was a kid, virus and worms were my thing. I used to to infect all my parents friends computers with backdoors and key loggers!.High School came around, I move a bit...fell off the computer game for many years.Came back as full blackhat a few years after HS, hacking and cracking anything I could..(mostly script kiddie shit). Fell off and came back once or twice more. In the process I've learned a lot from my mistakes! I've been back in the game for sometime now, just doing shit lone wolf. Most everything since I've been back is RedTeam shit, and that currently what I'm practicing. I'm an old school hacker/cracker/<>'er, and keeping up with tech! It is and will always be my go to! I love being a Pentester/Security Researcher!

FriendZone - December 20, 2018, 2:56 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Information Gathering, Networking, Captive Portals this mean Apache and HTML,php,javascript,

Dns spoofing, Metasploit framework in general, Coding (Python,C,Java), Operative Systems (linux in particular)

What topic(s) do you want to learn about most?

I have no preferences, I read everything and I learn from any source. That's why I'm here on HF. I move constantly from one topic to another and this forum is already offering a lot of material(even dumb questions can be helpful to learn something!)

Would you be willing to complete assignments on various topics?

Well, If I'm able to complete them why not

Are you willing to teach others on a regular basis?

Yes, teaching is the best way to improve, and I'm constantly helping in the beginner section, (Infamous gave me 400 bytes for my contributions last week).Spoiler [Click to View](https://hackforums.net/showthread.php?tid=5916844&pid=58010554#pid58010554)
<https://hackforums.net/showthread.php?tid=5916844&pid=58010554#pid58010554>

Why do you want to join Samaritans?

I can be considered new (join date 07/08/18) and to be honest I have a lot to learn about HF mechanics, probably joining Samaritans will give me more opportunities to teach and learn

Tell us a bit about yourself!

I have studied at University, to be honest even following different cyber security courses, my hacker knowledge come from forums, books, and online guides (Engineering in computer science helps a lot).

Well, I like blackhat but just for learning purposes, I love to make hack tools, new studied attacks, but never tried to gain something except knowledge.

I have just completed my work on captive portals/karma attack and I have builded my own tool (to give an idea, is something like fluxion,wifiphisher more complex but powerful) hoping to code something to make it avaiable even for beginners. And I'm actually working on a new project, it requires coding,proxy, and web stuffs but as soon I will complete it I will move on Ransomware protection (physical access).

I love rock music, videogames (only playing with friends) and I hate TV and social media. I prefer to spend my free time reading.

Bacardi Cola Lime - December 20, 2018, 6:13 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I am a Computer Science student at moment. I currently take lessons to take Networking and Telecommunications expertise. Through university, I gained good knowledge on how Networks work, how to set up a network and how mobile telecommunications work. CISCO certificates is my next goal.

What topic(s) do you want to learn about most?

Every knowledge I get is valuable to me. I want to work on this field and get as good as I can. One thing that I'm looking forward to learn, is everything that has to do with Network Security. My university is weak at providing lessons about it and I hope it's a good starting point for me to learn from other experienced members.

Would you be willing to complete assignments on various topics?

Yes, of course. I always want to help and provide my service/

Are you willing to teach others on a regular basis?

I can teach what I already know to members with less knowledge on the subject. Getting taught as

well, means a lot to me.

Why do you want to join Samaritans?

Both division leaders, have showed that they have strong knowledge on the field. Other members likewise. Sharing this knowledge can only do good and Samaritans, by offering this divisions, look like the perfect destination.

Tell us a bit about yourself!

Like I said, I'm a Computer Science student. I've always been passionate about the field. Working hard, humbleness and appreciation are my stronger points as an individual. My free time is filled with the company of good friends and good alcohol. I am a fan of photography and I frequently play football.

Thank you for your time!

Leroy Jethro Gibbs - December 20, 2018, 7:39 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Probably mostly general networking and computing. I work as an IT for a small furniture company and my only reason experience would have to be cleaning up malware and viruses. I have got more into networking since starting here a year ago. At this time, networking would be my main interest.

What topic(s) do you want to learn about most?

Discovering Vulnerabilities within Networks and how to exploit and prevent exploits.

Would you be willing to complete assignments on various topics?

Kinda depends on the assignments. Most likely any knowledge I learn from the group will be applied in my IRL job to test the security and safety of my companies networks.

Are you willing to teach others on a regular basis?

No but I wouldn't be against doing a tutorial every few weeks on things I learn and do within my network.

Why do you want to join Samaritans?

I'd rather learn for free rather than paying someone to show me videos of themselves "hacking".

Tell us a bit about yourself!

I'm an adult. I can purchase a pistol. Majority of my life is based around technology somehow. I work full time for a family owned retailer. I work best with a hands on approach to things. I am comfortable helping with whitehat issues as long as they don't become blackhat.

Aussie - December 20, 2018, 5:35 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I am a Sydney-based Software Engineer currently working at a company whose prime directive is to help banks in security. I work with Juniper SRX 300 service gateways, and I work within the various layers of the OSI model. At the very top in the application layer (well yeah? I'm studying to be a software engineer ;)) and the bottom layers such as the physical and data link layer.

What topic(s) do you want to learn about most?

Well since my work is primarily within Juniper products, I'd like to learn more about Cisco products; switches, etc etc... or pick up any cybersecurity skills along the way.

Would you be willing to complete assignments on various topics?

Being truthfully honest, no. Because I work 2 days a week and go university 3 days a week.

Although to show I'm capable, I'm happy offering my github profile and LinkedIn profile link to you to show you my skillset. I can do assignments only when I have a Christmas break and/or take my annual leave as I'll definitely have time then.

Are you willing to teach others on a regular basis?

Sure. I'd also like to learn from members along the way. When I become more well-versed in my Juniper networking devices, I intend on making YouTube videos teaching them - because I believe to demonstrate ultimate fluency in a skillset; one would be able to teach it.

Why do you want to join Samaritans?

Mainly to learn and grow: as I recently acquired a job pertaining to this field. I want to be with equal minded people who see each other as equal and are willing to learn and contribute to one another's mutual growth.

CheGuevara? - December 20, 2018, 5:39 pm

Good luck to all and nice to see this, great work Business & SysAdmin!

Angelis - December 30, 2018, 6:37 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Networking and Network Administration

What topic(s) do you want to learn about most?

Network Penetration Testing and Hardening

Would you be willing to complete assignments on various topics?

Yes

Are you willing to teach others on a regular basis?

Of Course

Why do you want to join Samaritans?

Seems like a very talented and friendly group with a lot of diversity.

Tell us a bit about yourself!

I am a Mature IT professional having worked in the field for numerous years.

CrouchingTig3r - December 30, 2018, 7:28 am

What field would you consider to be your area of expertise? Explain what experience you have in this field.

REPLY_GOES_HERE

I'm pretty new to the tech world.

What topic(s) do you want to learn about most?

REPLY_GOES_HERE

I want to learn about the career path that I've decided to go down. (Cyber Security)

Would you be willing to complete assignments on various topics?

REPLY_GOES_HERE

Yes.

Are you willing to teach others on a regular basis?

REPLY_GOES_HERE

Yes, I can teach all that I know while learning to help others learn.

Why do you want to join Samaritans?

REPLY_GOES_HERE

I want to learn about Network security and cyber security I feel that joining here I could expose myself and learn things geared to such topics. Not only am I interested in myself but I want to learn to teach aswell and help out in ways that I couldn't before.

Tell us a bit about yourself!

REPLY_GOES_HERE

Well I'm 19 haha, I've always had a passion for technology and field in general but I've always been indecisive about what I want to do as far as a career but I've finally figured it out. I'm just looking to learn learn learn. The more you know the more valuable you are in reality.

FriendZone - January 8, 2019, 10:34 am

Ehi is the Recruitment closed? I'm still trying to join! Helping and contributing in hacking section :)

_error_404_ - January 12, 2019, 3:31 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

There is always something new to learn. My focus at the moment would have to be PHP and AngularJS.

What topic(s) do you want to learn about most?

Malware development and exploit development.

Would you be willing to complete assignments on various topics?

As long as I'm not rushed. :)

Are you willing to teach others on a regular basis?

That's what hacking is partly about.

Why do you want to join Samaritans?

Meet new people. (shrug)

Tell us a bit about yourself!

Just a nub that wants to expand my skill set and knowledge.

I hope this isn't in too late.

hose10 - January 21, 2019, 12:09 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I have no prior knowledge on any field.I am just searching for years around forums doing different things without learning anything.

What topic(s) do you want to learn about most?

First of all i really want to learn coding and after follow the art of hacking

Would you be willing to complete assignments on various topics?

i am desperated to learn things and i want to devote myself on that purpose.I am willing to complete any assignment.

Are you willing to teach others on a regular basis?

As i have seen how is to struggle to get help and i am currently on that state i would help on instant.

Why do you want to join Samaritans?

It seems a legit group with known members about their knowledge that can be great help to me. Also i am searching for an educational group for long time and i just found one.

Tell us a bit about yourself!

I am 22 year old. I was trying for 2 years to enter computer science i failed then i decide to work hard to change the way of thinking and starting value the time i loose everyday so i was working for like 18 hours per day in two different jobs like a waiter in a club and a beach bar .Finally i understand that i have to work on myself and i am looking for a chance like this one to change things up.

bruiser - January 22, 2019, 3:19 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Networking, currently a network operations engineer.

What topic(s) do you want to learn about most?

Large scale datacentre network security (Studying for my CCNA Datacentre cert).

Would you be willing to complete assignments on various topics?

Happily, send them my way.

Are you willing to teach others on a regular basis?

Giving back is the heart of a community, I just found HF and already wish to contribute back.

Why do you want to join Samaritans?

To find like-minded individuals in IT, perhaps find a few metal heads along the way.

Tell us a bit about yourself!

Late twenties, worked in IT sector professionally for 8 years. Enjoy death/black metal, drinking my body weight in Kraken and socialising.

magicturtledotexe - February 5, 2019, 8:36 pm

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Now I just recently started learning about pentesting/cybersecurity. I have been learning for about a month now on both of those subjects and its something i want to pursue as a career in my life. I dont really have any experience in any fields but thats what you guys are here for right?

What topic(s) do you want to learn about most?

I would like to learn the basics of ethical hacking/pentesting and cybersecurity. Im hoping you guys can point me in the right direction so I can learn the things I need to learn to be able to pursue this as a career.

Would you be willing to complete assignments on various topics?

I will try my hardest to complete any obstacle put in my way.

Are you willing to teach others on a regular basis?

Whenever i gain the knowledge I would be more than happy to help others out who are willing to learn just as I am.

Why do you want to join Samaritans?

I want to join the Samaritans because you guys offer help and thats something ive been looking for

a long time now. I need human interaction with someone who can answer questions and help me out to point me in the right direction on what i need to learn.

Tell us a bit about yourself!

I am 18 years old and very active on discord and trying to become more active on the HF. I am a beginner hacker/programmer in the process of training to become a pentester. I currently run ParrotSecOS for my main distro because I am so dedicated on learning how to become a pentester/programmer.

What field would you consider to be your area of expertise? Explain what experience you have in this field.

Im not expert but I teached myself about everything. Right now Im learning Rails to dive in webdevelopment.

What topic(s) do you want to learn about most?

Im in love with coding so mostly coding. But networking is also interesting because of cybersecurity and thats a great field to explore for future development of my knowledge.

Would you be willing to complete assignments on various topics?

If its in my range of capabilities of course I would and if not Im willing to learn and be mentored.

Are you willing to teach others on a regular basis?

Yes. I myself am trying to learn new things everyday so why not sharing that knowledge with others.

Why do you want to join Samaritans?

I want to expand my coding knowledge and help others doing the same. I see you guys are in to network security and thats also field that I want to dive in to. I think this group would be a great asset to my learning process

Tell us a bit about yourself!

Im late 20's chilled dude living across the globe (yeap that means I travel a lot). I have been member of this forum for ages and now that Im mature enough I would like to use this place mainly for learning. I love spanish language, passionate cook, workouts and edm music.

What field would you consider to be your area of expertise? Explain what experience you have in this field.

I don't really have much, if anything if it comes to hardware/building a computer I'd say I'm pretty decent in there, I'm not going to say I'm 100% the go to guy, I'll get things wrong of course but yea, I don't really have much experience when it comes to Network Security hence the application.

What topic(s) do you want to learn about most?

Just Network Security in general, I've always wanted to get more involved in that field. I don't really have a specific mindset on what I want to do.

Would you be willing to complete assignments on various topics?

Yes of course I would be.

Are you willing to teach others on a regular basis?

If I learn much more then yes, I would be more than happy to help people as I like spending time with new people that are looking to seek help.

Why do you want to join Samaritans?

Well, I pretty much answered this in the first Question, I want to join due to wanting to learn more about Network Security and I know that this is the place.

Tell us a bit about yourself!

Pfff, Well where do I start? I'm 24 and I live in Scotland, I have a beautiful Irish Red Setter for a dog called Cooper and I'm just an all round swell guy to have around.
