Thread: [\\$10!!! GRAB YOUR FACEBOOK FRIENDS EMAILS + PHONE NUMBERS!!!. \\$10!!! btc only](#)

Mr. Robot - November 25, 2018, 3:24 am

<< Create a brand new FB and add people from certain groups to create mailing lists
<< Look up each email for passwords on weleakinfo.com

```
[contract=tid]Start Contract[/contract]
[contract=tid]Start Contract[/contract]
[contract=tid]Start Contract[/contract]
[contract=tid]Start Contract[/contract]
[contract=tid]Start Contract[/contract]
```

So I made this interface and easily usable on Windows - it's extremely easy and simple to use. It will both display and dump the emails and phone numbers as well as do individual lookups on first and last names in your friends list to display all kinds of information.

From this you can use a database website such as weleakinfo.com and pay \$2 for a 1 day subscription. During this one day, you can look up all your friends emails and find passwords for them.

I can't promise those passwords will be current and working - but you can certainly tease them or use it for other things.

No 2fa support so if you have 2fa on FB you will need to disable it then run this, then re-enable it afterwards.

You can add random people or targets to get their emails quite easily - I simply accepted a few requests I have had sitting there just to get more emails.

>> I'd highly recommend you simply create a brand new FB account either as a clone of yours then add the people you want to grab or make a fake account to add people on.
This also helps protect against others who might try grab your email.

Everything is really neat and the GUI is nice and simple. I tested this on my trolling/testing Facebook account with 5 friends added.

The program managed to extract 4 out of the 5 people's emails (which is pretty damn impressive) and just one phone number, but I think that's the only account that's added a number to it so that's alright.

Very handy tool if you have lots of friends and wanna extract all their stuff, would definitely be ideal if you were looking for an alternate to the old Yahoo mail extraction method.

Would be worth spending the \$50

EDIT: the email extraction was actually a 100% success, the only account that didn't work was deactivated or something. Facebook shows I have 5 friends but only lists the 4 for some reason.

Anything that Mr. Robot sells is high quality. Don't hesitate, the price is cheap af also.

I wouldn't say my coding is 10/10 on this one but there was no point putting makeup on a pile of code tryna make it look pretty. It works - no hassle. Will send you a copy now to try if you want.

other 3 were my friends IRL.

Ms-dos is our first buyer. Will wait for his opinion and review.

I bought the tool from Mr.Robot. It works pretty good

I tested it with my fb account and got emails from my 170 friends of 270, it's still a good rate for such a program for that price!

And got mobile numbers from 26 friends.

Vouch for him. A gui is not sexy at all but who cares, it does what is supposed to do

Cheers as in the OP I am looking into the accounts it doesn't pull. Something weird going on there -

dunno if it's character specific or what. If an update is found I will send it through no issues.

No but it is the same method in the FBI python script (using graph and access tokens) . This is fully windows dependant and will run as is without installing anything else for both ease of use and combining data / organizing data which that one doesn't do.

Yes I am sure the access token isn't sent to anyone else - only to graph.facebook.com.

I know how to ban any Facebook account as long as you have birthdate and email.

Correct , but you should warn the buyers they mustn't use it on their real accounts so if anything happened to their accounts in future u will be out of blame.

They can blame me all they want. That's like blaming a website for leaking their IP because a user has a dynamic image.

I'll add in that they should create a new clone of their account or something and use that so I don't get some bullshit from kids in 6 months.

Appreciate it though.

Just tested it out and it seems to work really well. The gui is pretty creepy though lol.

Some suggestions if you want to keep developing this:

1. Add an export to csv or txt feature
2. Add some sort of progress tracker.

Good job though very quick

Ah so you were one of the other buyers. Well thank you. I will do some updates in the future but my goal is just to make something easy to use on the fly without a hassle. Once you have the text files with emails and phone numbers you are pretty much good to go.

(Another advantage over the no longer working yahoo method - exporting them that nicely)

No lmao this isn't weleakinfo - that's a database lookup website. This grabs YOUR friends emails and phone numbers from YOUR Facebook. Then once you have their phone numbers and emails, you can look them up in whatever databases you want. This has nothing to do with databases, I just add that as a way you can obtain information about each target after you use this.

Would love to PM you for more information but I got to hit the criteria. Any chance you could hit me up with a PM? Thank you

One question, why do you recommend we make a fake or clone account when using this?

1. They then can't get your email.
2. You can mass add a bunch of people to a particular niche without it pulling any of your real friends emails.

thedogcampaign - April 14, 2019, 8:48 pm

hi,
your tool can get email and phone if they set email "only me" ?

Mr. Robot - May 15, 2019, 11:18 am

This is up for sale once again.

Raymond "Red" Reddington - May 15, 2019, 11:22 am

This looks kinda epic.
Might look into this.

Bull - May 15, 2019, 11:24 am

Aren't you disallowed to post an autobuy link especially if you are not a vendor who still must link it to auto-contracts ?

No issues.

jambos - May 16, 2019, 4:34 am

its still working? can use on mass accounts?

throwaway5 - May 16, 2019, 6:22 am

Doesnt FB throttle the fuck out of that?

You can't go on and add 500 people in a day and not get your account locked AFAIK.

How many people per day can you add on a new account in your experience?

Mr. Robot - May 16, 2019, 2:35 pm

(May 16, 2019 02:32 PM)throwaway5 Wrote: [\[CITE\]](#) How many people per day can you add on a new account in your experience?

I've added 300+ without an issue. I don't know what the limit is if there is one. Usually I just join groups of niches such as "Runescape" and get people to add me and then I pull the emails - instead of adding them.

throwaway5 - May 16, 2019, 5:23 pm

How do you get them to add you?

@Mr. Robot

does it look for email in their profil ? like if the person chooses not to display his email to his friends

it won't come up
or it's the same way as the old yahoo method that grabs most of the emails even if the person chooses not to show it in his profil ?

Mr. Robot - May 28, 2019, 5:27 pm

It uses the facebook API service
<https://graph.facebook.com>

It will grab your access token to find your friends then pull from there.

nitro.781 - May 28, 2019, 8:48 pm

i started a contract:)

I'm not sure if I can close the payment but it stays open for a little bit - let it expire or find the BTC in that time.
