Thread: [Are twitch services not allowed anymore?](#)

Recloc - November 25, 2018, 9:06 am

Hello HF, I noticed that my supplier twitchincomes got closed on hf. I tried to look if he exit scammed or anything like that but he got ban for black hat activity. If you got ban for selling subs they are still user selling those services. Just curious on what is the ruling with twitch services.

I dont believe twitch services were closed but your dealer was probably doing some black hat activity that got him banned. I dont know the details why tho, but probably he did some carding or illegal stuff.

From the warnings it looks like he was involved in paypal fraud

He received warning for that and he was all right. That was not the case that got him ban. The blackhat activity was considered to be the bot used to sell subs. So people get closed for selling bots but dont get closed for selling the accounts. THAT DOESNT MAKE SENSE. You dont allow bots but you allow accounts from the bot.

He was closed for being involved with certain blackhat activities. Twitch services are still allowed at the moment of writing this post.
