Thread: [Single File FUD Crypting Service | Pay per Stub | Cheap](#)

taleoftwocities - November 25, 2018, 3:44 pm

Hello guys. ?

I decided to offer you my own crypting service, since i remember back in the days i wanted to crypt my files but no one was selling crypting for single file.

So yeah, its helpful for begginers who don't know yet if they will continue their adventure with RATs, Bots and so on. So there is no point in buying expensive life time crypter for now.

I am using my own crypter.

Price is 10\$.

How it works:

- Contact me

- Send me file

- I make it FUD, and send you screenshot of it.

- Pay with BTC. I use paypal only if you cannot do BTC transfer.

- Send you crypted file.

Simple as that, everyones happy ?

Stays FUD usually for 2 weeks. After that time you can contact me and i will reFUD it for free.

Cheers ?
