Thread: [Might not have internet for a few days](#)

Mr. Robot - November 27, 2018, 11:53 am

Organizing a moving truck for probably today or tomorrow but internet doesn't get turned on till the 30th. Gonna have to hijack the neighbors lmao otherwise will be away for a few days.

Once internet is on, I will be back in FULL FORCE on HF rather than these half assed replies. Live streams at the highest possible quality, tutorials out my ass and questionable lounge posts all day.

What are you guys up to? Anyone going away for holidays?

Will be taking it all there tomorrow but taking my main PC tonight and cracking into the neighbors WiFi. 8 hours tops.

Most providers will limit your speed after so much usage, even with an unlimited data plan.

Sleep - November 27, 2018, 2:53 pm

Spend the last month fishing in a game. And the next month will be used jumping roofs in the same

game. Nop I'm not going anywhere for the holidays :D

Anyways have fun moving. And looking forward to better quality streams! :P

Still better than no internet at all, plus I doubt he'd use that much internet in 2/3 days unless he is live streaming or downloading large files. Either way I only pay £15 gbp (around \$19) a month for 24gb which is enough for most stuff I do, and I have stuff downloaded on my devices anyway so that I don't have to stream it.

Ram - November 27, 2018, 3:23 pm

Ask your neighbours and make sure to take pics of your new place :D

- Z - - November 27, 2018, 4:28 pm

Almonds - November 27, 2018, 4:39 pm

can't wait to see your activity spike; perhaps i'll learn a thing or two from tuning in.

Don't forget to pat yourself on the back once you settle in ?

Yin Yang - November 27, 2018, 4:40 pm

Damn that sucks, but hope you can manage. Maybe even hit up a coffee shop with free WiFi?

i like the flats tho for real

Good luck n the moving

ririki - November 27, 2018, 10:04 pm

fuck yeah man, haha.

I like the nice clean room

about hijacking neighbours, remembers me hahaha, some of our neighbours here uses old routers/modems that are vulnerable, internet speed is fast, however I am not sure where is the router located, got 5 lines but whenever I change my position the connection gets like 150Kbps

(hijacking only for educational purposes with permission from owner ?)

Bluffer - November 27, 2018, 10:07 pm

No internet sucks so bad when you get bored.

Last time I moved when I setup my PC I ended up going through bunch of folders from years earlier and cleaned up my computer a bit since I had no net.

MAST3RM1ND19 - November 27, 2018, 10:54 pm

Dam it but don't worry it's only 3 days time will fly

lol yh but does that even matter

Bacardi Cola Lime - November 28, 2018, 12:29 am

When I moved place, coffee shops saved my life. 2 hours at minimum of staying there with my laptop. It took a week till I had my own Internet connection so I'd drunk tons of coffee ? When I wasn't at a coffee shop, I used mobile data but only for social media.

A + - November 28, 2018, 9:57 am

What you think you're a HF celebrity or something haha? I'm jk, I just moved to a new place and didn't have Internet for a day or two. It's kind of a pain in the arse, I didn't realize I had so much free time. Looking forward to seeing you back around big guy.

ieatchickendinners - November 28, 2018, 9:59 am

good luck with your move. hope the new place is dope.

why don't you just use your phone? I only computered off my phones hotspot when I lived in the mountains with unlimited 4g.

nummus - November 28, 2018, 10:04 am

Nice room man. You should visit some hookers while they bring your stuff.

Where I live its not allowed to limit it, they made new laws about it so I have unlimited data without any limitations and it feels great!

Reading this while using wifes cellphone

I don't use a Sim card in my phone as I use both my Nexus devices for pentesting. Network access can be handy for pentesting too but not too keen on their rates

Hacked business wifi but HF is block lmao

ieatchickendinners - November 28, 2018, 9:24 pm

You don't have a personal phone? props if so. cell phones are addicting as a MF.

emotionull - November 28, 2018, 9:37 pm
