Subscribing to see some review first.

Will be great if user vouching stays in group for at least a week to see results.

My vouch copy review:

I used his services for 5 days and gained 5% everyday for a total of 25% on my investment, yes it requires in investment after purchasing. As you can see from my images:

Spoiler [\(Click to View\)](#)

Don't look at the \$ value because BTC has dropped within them 5 days, so look at the BTC difference.

Obviously the more you invest the more you're going to make. If you're looking for easy money that you don't have to do anything for, then this is perfect for lazy people! It's very simple and you can withdraw anytime.

He has an investor list which shows who and how much people have invested and when they withdraw.

and his great method! Don't hesitate to purchase and let the money come rolling in without any work. I appreciate the money my friend! ?

Isn't it at the end of the day still gambling and you won't lose all or a big chunk while trying to gain

5%, won't it eventually happen ?

Okanbey1 do you think I haven't thought about this? The chance of this happening is very very low, we still haven't lost once since the ROI we are aiming to reach every single day is 10% and its pretty easy to achieve it for me. The maximum loose I go for a single day is 20%-30% down from the total balance. The next days when we hit the target again I giving my 5% to the users inside the group so we can recover faster, as long as we are on the green road once again I do not get my 5%.

I've played on bustabit alot both manually and with lots of different scripts, settings and i've got raped by the red rape train that had 24 reds in a row so i'm a bit skeptical about all this and if you can make easy roi why share and saturate or even deal with people or give them 5% for just 20\$

Its not my fault that you cannot profit on it. Playing BustaBit with script is useless, you always get on loss. I am giving people those because it can't get saturated because I am playing manually, also I am charging the half of the 10% ROI for my self (5% for me). The 20\$ is only an access to the group. :)

Bump guys! Get the access now!
