Thread: [Scammed by Pronouncer uid=3396018 for 29,99\\$ BTC](#)

BlueHorizon59 - November 28, 2018, 2:58 pm

Profile link :

hackforums.net/member.php?action=profile&uid=3396018

Description :

Hello,

I bought MANGOCRYPTER on 11/11/2018, this encrypter promises to protect applications, however when I first use it, my file is detected at 10/23 detections, I am not the only user in the same case and this would come from a problem with encryption (MSIL detections), I contacted Pronouncer who was supposed to perform an update the next day, the update was released on 28/11/2018 (17 days after !), I put the problem on the official topic of the encrypter, except that the seller closed his topic, I now find myself with nothing with a product that does not work at all, I would like to be refunded thank you, I gave all the evidence in the following screenshots:

Proof :

Bear - November 28, 2018, 3:02 pm

that 29,99 comma tripped me so bad. I was like, "Pronouncer scammed someone 30k?"

Completely unrelated but I hope this gets solved if its true. Pronouncer seemed to be a good guy, no personal opinion, just observation.

Meow - November 28, 2018, 3:09 pm

I assume you don't have a contract linked to this dispute?

Have you tried resolving this issue with the Pronouncer himself? I'm sure he can help you out with this issue.

BlueHorizon59 - November 28, 2018, 3:10 pm

I think he's a good person too, I hope to be refunded

Pronouncer - November 28, 2018, 3:12 pm

1. "my file is detected at 10/23 detections" Most of those detections come from your stub itself causing issues, no crypter can FUD every single stub if your not using shit leached malware its easier to get fud, infact at that same time you crypted your file i responded with a fresh scan and only had 1 detection.

2. As for the updates, We did push updates, just didnt update the message as me and my dev have been working hard to write a fresh USG.

3. The thread was closed till we fixed hte update bug, which my developer is in the process of doing, and has already helped 2 people fix it.

4. Why would i close the thread while i have a sticky unless its to stop pruchasing during downtime so that they dont get upset, things happen, we are using a completly new license system and a memory load injection yes there was a bug but its literally being fixed as we speak.

5. Its way to late at night, i will talk to my dev tomorow and sort this

6. On the thread i have already stated everyone will be compensated for the downbtime.

(Nov 28, 2018 04:09 PM)Meow? Wrote: [\[CITE\]](#) I assume you don't have a contract linked to this dispute?

Have you tried resolving this issue with the Pronouncer himself? I'm sure he can help you out with this issue.

He messaged me a few hours, saying he had a problem. Keep in mind i got home from uni 2 hours ago after my exams, and now am only at a proper PC, not on my phone. Its 11pm and i gotta be up at 5am. The user couldnt wait 24 hours for the update to be fixed.

User asked for help 3 hours ago on the thread,

2 hours after all of that the software was already being fixed new stubs better injection

<https://hackforums.net/showthread.php?tid=5906287&pid=57940682#pid57940682>

Since you have purchased 17 days, and have used spreaded and contributed to detections. We are willing to offer a refund for the remainder of your days.

$\$29.99/30 = 0.966$ Per day is the cost. You have used 17 Days, out of 30 meaning 13 Days remain = \$13 Refund for the remainder of the time and your license will be suspended along with HWID logged.

EDIT: Offer revoked. User claimed never used the stub, user infected honey pots and using it illegally

(Nov 28, 2018 05:03 PM)BlueHorizon59 Wrote: [\[CITE\]](#) LOL i never use a crypter file when i see the file are detected i don't use...

17 days of waiting for a update...

And you don't want refund integrally ?

It's a joke ?

Check on your topic my messages...

Hmm Dont use yeah.

Your third screenshot shows this file hash from my crypted stub -

Just using your screen shots alone and a few google searches I can tell you have aggressively spread this binary.

Your complaining about detection's but your files listed on virtually every single scanner site I can come across.

Honestly speaking, if I were Pronouncer, I'd simply ban you and tell you to take a hike, your lucky he's even willing to offer a partial refund as far as I am concerned. Take it and STFU... Seriously.

Pronouncer - November 28, 2018, 4:15 pm

Im a talk to him about this as well.

Frankly I dont feel you deserve shit for all of this.

You have done nothing but provide some screen shots and a claim.

You can not even provide the file you claim was a problem, how can these claims even be verified at this point? ?

You failed on so many levels here. Your claim and dispute is invalid.

partyboyMac - November 28, 2018, 5:27 pm

You are telling him what he told Armada for the exact same reasons, yet he is wrong but you and armada are right? ?

Yes i'm bored.

You honestly think anything that idiot says to me is taken anywhere close to seriously? looooo

I get called an asshole and other such names about 10-15 times a day. Some multi whos upset and clearly has something against me, you think thats gonna phase me ONE BIT? ?

All I can say at this point, given everything Pronouncer was provided and shown, I hope he makes the right decision and tells OP to take a hike. BUT, not my business/product or decision.

What I said through this entire thread about the situation is my personal opinion. NOthing more, you can agree or disagree with me.. I dont really care honestly.

No definitely wasn't thinking that you would give a crap about what he was saying or what he thinks. Just noticed sh4moon's reply and had to reply to it.

Trust me i don't want to steal you, you have all proofs on the scan results, this is the ONLY file i used and scanned on scanmybin.

I crypter a simple file i created for NO ILLEGAL ACTIVITIES.

Thanks

OBVIOUSLY IF YOU CRYPT SOMETHING YOU HAVE THE FILE RECYCLING BIN.

Yeah, after looking into the stub, matching hashes showing the stub was used, login logs, i wont be refunding as said in my first post. User refuses to say what software he is using which is fine. however not being able to provide the stub with the big issue is a problem, all he has given me is a single scan, and under 4 hours. License suspended. Dont think we wouldnt find out you raped our stub.

Edit: Pm'ed staff for a second opinion before i do anything
